| <b>List of Figures</b>   | <b>xiii</b> |
| <b>List of Tables</b>  | <b>xv</b>   |
| <b>Preface</b>   | <b>xxi</b>  |
| <b>1 Introduction</b>  | <b>3</b>    |
| 1.1 The Random Walk and Efficient Markets . . . . .  | 4           |
| 1.2 The Current State of Efficient Markets . . . . .   | 6           |
| 1.3 Practical Implications . . . . .   | 8           |
| <b>Part I</b>  | <b>13</b>   |
| <b>2 Stock Market Prices Do Not Follow Random Walks: Evidence from a Simple Specification Test</b> | <b>17</b>   |
| 2.1 The Specification Test . . . . .   | 19          |
| 2.1.1 Homoskedastic Increments . . . . .   | 20          |
| 2.1.2 Heteroskedastic Increments . . . . .   | 24          |
| 2.2 The Random Walk Hypothesis for Weekly Returns . . . . .  | 26          |
| 2.2.1 Results for Market Indexes . . . . .   | 27          |
| 2.2.2 Results for Size-Based Portfolios . . . . .  | 30          |
| 2.2.3 Results for Individual Securities . . . . .  | 32          |
| 2.3 Spurious Autocorrelation Induced by Nontrading . . . . .                                       | 34          |
| 2.4 The Mean-Reverting Alternative to the Random Walk . . . . .                                    | 38          |
| 2.5 Conclusion . . . . .   | 39          |
| Appendix A2: Proof of Theorems   | 41          |

|          |   |            |
|----------|---|------------|
| <b>3</b> | <b>The Size and Power of the Variance Ratio Test in Finite Samples:<br/>A Monte Carlo Investigation</b> | <b>47</b>  |
| 3.1      | Introduction . . . . .  | 47         |
| 3.2      | The Variance Ratio Test . . . . .   | 49         |
|          | 3.2.1 The IID Gaussian Null Hypothesis . . . . .  | 49         |
|          | 3.2.2 The Heteroskedastic Null Hypothesis . . . . .   | 52         |
|          | 3.2.3 Variance Ratios and Autocorrelations . . . . .  | 54         |
| 3.3      | Properties of the Test Statistic under the Null Hypotheses . . . . .                                    | 55         |
|          | 3.3.1 The Gaussian IID Null Hypothesis . . . . .  | 55         |
|          | 3.3.2 A Heteroskedastic Null Hypothesis . . . . .   | 61         |
| 3.4      | Power . . . . .   | 68         |
|          | 3.4.1 The Variance Ratio Test for Large $q$ . . . . .   | 69         |
|          | 3.4.2 Power against a Stationary AR(1) Alternative . . . . .  | 70         |
|          | 3.4.3 Two Unit Root Alternatives to the Random Walk . . . . .   | 73         |
| 3.5      | Conclusion . . . . .  | 81         |
| <b>4</b> | <b>An Econometric Analysis of Nonsynchronous Trading</b>  | <b>85</b>  |
| 4.1      | Introduction . . . . .  | 85         |
| 4.2      | A Model of Nonsynchronous Trading . . . . .   | 88         |
|          | 4.2.1 Implications for Individual Returns . . . . .   | 90         |
|          | 4.2.2 Implications for Portfolio Returns . . . . .  | 93         |
| 4.3      | Time Aggregation . . . . .  | 95         |
| 4.4      | An Empirical Analysis of Nontrading . . . . .   | 99         |
|          | 4.4.1 Daily Nontrading Probabilities Implicit in Auto-<br>correlations . . . . .                        | 101        |
|          | 4.4.2 Nontrading and Index Autocorrelations . . . . .   | 104        |
| 4.5      | Extensions and Generalizations . . . . .  | 105        |
|          | Appendix A4: Proof of Propositions  | 108        |
| <b>5</b> | <b>When Are Contrarian Profits Due to Stock Market Overreaction?</b>                                    | <b>115</b> |
| 5.1      | Introduction . . . . .  | 115        |
| 5.2      | A Summary of Recent Findings . . . . .  | 118        |
| 5.3      | Analysis of Contrarian Profitability . . . . .  | 121        |
|          | 5.3.1 The Independently and Identically Distributed Bench-<br>mark . . . . .                            | 124        |
|          | 5.3.2 Stock Market Overreaction and Fads . . . . .  | 124        |
|          | 5.3.3 Trading on White Noise and Lead–Lag Relations . . . . .   | 126        |
|          | 5.3.4 Lead–Lag Effects and Nonsynchronous Trading . . . . .   | 127        |
|          | 5.3.5 A Positively Dependent Common Factor and the<br>Bid–Ask Spread . . . . .                          | 130        |
| 5.4      | An Empirical Appraisal of Overreaction . . . . .  | 132        |

|                |  |            |
|----------------|--|------------|
| 5.5            | Long Horizons Versus Short Horizons . . . . .  | 140        |
| 5.6            | Conclusion . . . . .   | 142        |
|                | Appendix A5 . . . . .  | 143        |
| <b>6</b>       | <b>Long-Term Memory in Stock Market Prices</b>   | <b>147</b> |
| 6.1            | Introduction . . . . .   | 147        |
| 6.2            | Long-Range Versus Short-Range Dependence . . . . .   | 149        |
|                | 6.2.1 The Null Hypothesis . . . . .  | 149        |
|                | 6.2.2 Long-Range Dependent Alternatives . . . . .  | 152        |
| 6.3            | The Rescaled Range Statistic . . . . .   | 155        |
|                | 6.3.1 The Modified $R/S$ Statistic . . . . .   | 158        |
|                | 6.3.2 The Asymptotic Distribution of $Q_n$ . . . . .   | 160        |
|                | 6.3.3 The Relation Between $Q_n$ and $\tilde{Q}_n$ . . . . .                                     | 161        |
|                | 6.3.4 The Behavior of $Q_n$ Under Long Memory<br>Alternatives . . . . .                          | 163        |
| 6.4            | $R/S$ Analysis for Stock Market Returns . . . . .  | 165        |
|                | 6.4.1 The Evidence for Weekly and Monthly Returns . . . . .                                      | 166        |
| 6.5            | Size and Power . . . . .   | 171        |
|                | 6.5.1 The Size of the $R/S$ Test . . . . .   | 171        |
|                | 6.5.2 Power Against Fractionally-Differenced Alternatives . . . . .                              | 174        |
| 6.6            | Conclusion . . . . .   | 179        |
|                | Appendix A6: Proof of Theorems . . . . .   | 181        |
| <b>Part II</b> |  | <b>185</b> |
| <b>7</b>       | <b>Multifactor Models Do Not Explain Deviations from the CAPM</b>                                | <b>189</b> |
| 7.1            | Introduction . . . . .   | 189        |
| 7.2            | Linear Pricing Models, Mean-Variance Analysis,<br>and the Optimal Orthogonal Portfolio . . . . . | 192        |
| 7.3            | Squared Sharpe Measures . . . . .  | 195        |
| 7.4            | Implications for Risk-Based Versus Nonrisk-Based<br>Alternatives . . . . .                       | 196        |
|                | 7.4.1 Zero Intercept $F$ -Test . . . . .   | 197        |
|                | 7.4.2 Testing Approach . . . . .   | 198        |
|                | 7.4.3 Estimation Approach . . . . .  | 206        |
| 7.5            | Asymptotic Arbitrage in Finite Economies . . . . .   | 208        |
| 7.6            | Conclusion . . . . .   | 212        |
| <b>8</b>       | <b>Data-Snooping Biases in Tests of Financial Asset Pricing Models</b>                           | <b>213</b> |
| 8.1            | Quantifying Data-Snooping Biases With Induced Order<br>Statistics . . . . .                      | 215        |
|                | 8.1.1 Asymptotic Properties of Induced Order Statistics . . . . .                                | 216        |
|                | 8.1.2 Biases of Tests Based on Individual Securities . . . . .                                   | 219        |

- 8.1.3 Biases of Tests Based on Portfolios of Securities . . . 224
- 8.1.4 Interpreting Data-Snooping Bias as Power . . . . . 228
- 8.2 Monte Carlo Results . . . . . 230
  - 8.2.1 Simulation Results for  $\tilde{\theta}_p$  . . . . . 231
  - 8.2.2 Effects of Induced Ordering on  $F$ -Tests . . . . . 231
  - 8.2.3  $F$ -Tests With Cross-Sectional Dependence . . . . . 236
- 8.3 Two Empirical Examples . . . . . 238
  - 8.3.1 Sorting By Beta . . . . . 238
  - 8.3.2 Sorting By Size . . . . . 240
- 8.4 How the Data Get Snooped . . . . . 243
- 8.5 Conclusion . . . . . 246
  
- 9 Maximizing Predictability in the Stock and Bond Markets . . . . . 249**
  - 9.1 Introduction . . . . . 249
  - 9.2 Motivation . . . . . 252
    - 9.2.1 Predicting Factors vs. Predicting Returns . . . . . 252
    - 9.2.2 Numerical Illustration . . . . . 254
    - 9.2.3 Empirical Illustration . . . . . 256
  - 9.3 Maximizing Predictability . . . . . 257
    - 9.3.1 Maximally Predictable Portfolio . . . . . 258
