

Paul Sterry & Brian E. Small

Birds of Western North America

A Photographic Guide

Birds of Eastern North America

A Photographic Guide

Combining informative and accessible text, up-to-date maps, and—above all—stunning color photographs, these are the best and most lavishly illustrated photographic guides to the birds of eastern and western North America. All of the images have been carefully selected to convey both the sheer beauty and the key identification features of each bird, and many of the photos are larger than those found in other guides. Wherever possible, a variety of plumages are pictured, providing visual coverage and usefulness matching any artwork-illustrated field guide. And many of the images are state-of-the-art digital photographs by Brian Small, one of North America’s finest bird photographers. These pictures, many seen here for the first time, reproduce a previously unimaginable level of detail. Finally, the ranges of nearly all species are shown on maps from the Cornell Laboratory of Ornithology, the authority on North American birding. New and experienced birders alike will find this guide indispensable: the clear layout will help novices easily identify the birds they see, while the superb photographs will help seasoned birders confirm identifications.

THE FINEST, MOST LAVISHLY ILLUSTRATED
PHOTOGRAPHIC GUIDES TO THE
BIRDS OF NORTH AMERICA

- ◆ The best, most lavishly illustrated photographic guides to the regions' birds
- ◆ Larger color photos than most other field guides
- ◆ Fresh contemporary design—clear, easy-to-use, and attractive
- ◆ Informative, accessible, and authoritative text
- ◆ Range maps from the Cornell Laboratory of Ornithology
- ◆ Birds of Eastern North America covers entire eastern half of mainland North America and the arctic and subarctic territorial islands of the United States and Canada
- ◆ Birds of Western North America covers entire western half of mainland North America (excluding Mexico) and the arctic and subarctic territorial islands of the United States and Canada (excluding Hawaii)

Paul Sterry is a highly regarded and best-selling wildlife author and photographer. He is the author or coauthor of more than 50 books, including the HarperCollins Complete North American Wildlife and the Collins Complete British Birds. **Brian E. Small** is a leading nature photographer and author, and the photo editor of *Birding* magazine. He has been the principal photographer for many photographic field guides, including *The Smithsonian Field Guide to the Birds of North America* (HarperCollins) and *Birds of North America* (Houghton Mifflin).

THE ESSENTIAL PHOTOGRAPHIC GUIDE TO
SHOREBIRDS OF THE NORTHERN HEMISPHERE

“Chandler has devoted his life to studying and photographing shorebirds and is truly an expert and an authority. The numerous high quality illustrations in this guide are one of its most stunning features. Readers will find them to be of immense value when trying to identify an unfamiliar shorebird or plumage, as well as simply being a pleasure to look at.”
—Wayne R. Petersen, Massachusetts Audubon Society

Shorebirds of North America, Europe, and Asia

A Photographic Guide

Richard Chandler

Shorebirds are prized among birders for their stunning plumages, evocative calls and songs, extensive migration patterns, and the unique challenges they pose for identification. *Shorebirds of North America, Europe, and Asia* is an illustrated guide to all 134 shorebird species found in the Northern Hemisphere, written by one of the world’s leading shorebird experts. It features more than 850 stunning color photographs and a color distribution map for every species. Detailed species accounts describe key identification features, age and sex differences, variations in plumage, similar species, status, habitat, and distribution. This easy-to-use guide also includes comprehensive primers on plumage patterns and terminology, molting, feeding and other behaviors, and much more. This premier illustrated guide is suitable for field use and a must-have for armchair naturalists.

- ◆ Covers all 134 shorebird species found in the Northern Hemisphere
- ◆ Features more than 850 color photographs that make identification easy
- ◆ Includes detailed species accounts that describe key identification features, status, habitat, distribution, and more
- ◆ Provides a full-color distribution map for every species

Richard Chandler is a renowned shorebird specialist and photographer and a longtime editorial board member for *British Birds* magazine. He is the author of *North Atlantic Shorebirds*.

Mammals of North America

Second Edition

Roland W. Kays & Don E. Wilson

The best-selling field guide that “sets new standards” (*New Scientist*) and “makes all other field guides for mammals of the United States . . . and Canada obsolete” (*Journal of Mammalogy*) is now even better. Covering 20 species recognized since 2002 and including 13 new color plates, this fully revised edition of *Mammals of North America* illustrates all 462 known mammal species in the United States and Canada—each in beautiful color and accurate detail. With a more up-to-date species list than any other guide, improved facing-page descriptions, easier-to-read distribution maps, updated common and scientific names, and track and scat illustrations, this slim, light, and easy-to-use volume is the must-have source for identifying North American mammals.

Roland Kays and Don Wilson have scoured the technical literature to pull out the key differences between similar species, and illustrated these whenever possible, making the guide useful to amateur naturalists and professional zoologists alike. Casual animal watchers will appreciate the overview of mammal diversity and the tips on identifying animals they can spy in their binoculars, while scientists will appreciate the exacting detail needed to distinguish similar species, including illustrations of shrew teeth, bat toes, and whale dorsal fins.

- ◆ The best-illustrated and easiest-to-use field guide to North American mammals
- ◆ Beautiful and accurate color illustrations of all 462 mammals found in the United States and Canada—including 20 species recognized since 2002
- ◆ 112 color plates—including 13 new ones
- ◆ Key identification information—fully revised—on facing pages
- ◆ The most current taxonomy/species list
- ◆ Fully revised, easy-to-read range maps
- ◆ Illustrations of tracks, scat, and whale and dolphin dive sequences

Roland W. Kays is the curator of mammals at the New York State Museum. **Don E. Wilson** is a senior scientist at the Smithsonian Institution’s National Museum of Natural History. His books include *The Smithsonian Book of North American Mammals* and *Mammal Species of the World*.

THE BEST FIELD GUIDE TO
NORTH AMERICAN MAMMALS

Praise for the first edition:

“[M]akes all other field guides for mammals of the United States (exclusive of Hawaii) and Canada obsolete.”

—**Jerry R. Choate**, *Journal of Mammalogy*

“[S]ets new standards in field guides. A must for any biological traveller to the US or Canada, as well as for residents.”

—**Adrian Barnett**, *New Scientist*

FIELD GUIDES ■ MAMMALS

A Photographic Guide to the Birds of Jamaica

Ann Haynes-Sutton,
Audrey Downer &
Robert Sutton

Jamaica is home to more than 300 bird species, including about 25 endemics, making the island one of today's most desirable birding destinations. *A Photographic Guide to the Birds of Jamaica* covers every species, including vagrants, and is specially designed for easy, at-a-glance reference in the field. This unique illustrated guide features 650 stunning color photographs as well as detailed species accounts that describe key identification features, voice, habitat, confusion species, status, and distribution. There is also a distribution map for resident and migrant birds. On the bookshelf or in the coat pocket, this is a one-of-a-kind photographic guide to the birds of Jamaica.

- ◆ Covers every bird species in Jamaica
- ◆ Features 650 color photographs
- ◆ Describes key identification features, voice, habitat, and more
- ◆ Provides a distribution map for resident and migrant birds
- ◆ Designed for easy, at-a-glance reference

Ann Haynes-Sutton is a zoologist, tour leader, and photographer in Jamaica, where she has lived for more than thirty years. She and her late husband **Robert Sutton** have written extensively on Jamaican birdlife. **Audrey Downer**, who died in 2008, was a renowned ornithologist and expert on the birds of Jamaica.

Birds of Borneo

Brunei, Sabah, Sarawak, and Kalimantan

Susan Myers

This is the first comprehensive field guide to illustrate and describe the varied bird species of Borneo, an ecologically significant island comprising Brunei, the Malaysian states of Sabah and Sarawak, and the Indonesian provinces of Kalimantan. With close to 1,600 beautiful color illustrations and 630 color distribution maps, this up-to-date guide identifies and details more than 620 bird species by key characteristics and habitat information. It also includes all recently split species, and provides full coverage of the Bornean endemics and distinctive races when they differ from their counterparts on neighboring islands or in mainland Southeast Asia.

Birds of Borneo is the essential resource for all birdwatchers and wildlife enthusiasts interested in this remarkable and unique region.

- ◆ A convenient single-volume guide to the bird species of Borneo
- ◆ Up-to-date information on key characteristics and habitats
- ◆ Close to 1,600 color illustrations of more than 620 bird species
- ◆ 630 color distribution maps
- ◆ Includes recently split species and distinctive Bornean races

Susan Myers is an experienced birder and naturalist based in Melbourne, Australia. She has led tours throughout Asia for Victor Emanuel Nature Tours for more than fifteen years.

Birds of Europe

Second Edition

Lars Svensson,
Dan Zetterström &
Killian Mullarney

Since it was first published a decade ago, *Birds of Europe* has become the definitive field guide to the diverse birdlife found in Europe. Now this superb guide has been brought fully up to date with revised text and maps along with added illustrations. Uniquely designed for easy use in the field, this expanded edition covers all 722 species found in the region as well as 23 introduced species or variants and 103 very rare visitors. Detailed species accounts describe key identification features, voice, habitat, range, and size. More than 3,500 full-color illustrations depict every species and all major plumage variations, and color distribution maps provide detailed breeding, wintering, and migration ranges for every species.

Complete with an introduction to each group of birds that addresses major problems of observation and identification, this new edition is the ultimate field guide to Europe's fascinating birdlife.

- ◆ Expanded and fully updated
- ◆ Covers all 722 species found in Europe, 23 introduced species or variants, and 103 very rare visitors
- ◆ Features more than 3,500 color illustrations that depict every species
- ◆ Includes detailed species accounts
- ◆ Provides color distribution maps for every species
- ◆ Color plates face text and maps for at-a-glance identification

Lars Svensson is one of Europe's foremost field ornithologists. **Dan Zetterström** and **Killian Mullarney** are two of Europe's leading bird artists.

Trogons

A Natural History of the Trogonidae

Joseph M. Forshaw

Illustrated by Albert Earl Gilbert

This is the definitive natural history of the spectacularly beautiful tropical birds known as the trogons, a family that includes the legendary Resplendent Quetzal, the sacred bird of the ancient Mayans and Aztecs. A collaboration between renowned ornithologist Joseph Forshaw and eminent bird artist Albert Gilbert, *Trogon* combines science and art to create an unprecedented picture of a threatened bird family. With its large format, more than 40 full-color plates, and state-of-the-art five-color printing, this limited-edition book promises to become a classic and a collector's item.

- ◆ Text provides the most authoritative and comprehensive account of the trogons ever written
- ◆ Paintings accurately depict for the first time all trogon species in their natural habitats and true colors
- ◆ More than 80 color and black-and-white illustrations, including a foldout color plate of the Resplendent Quetzal
- ◆ Large format and state-of-the-art five-color printing
- ◆ Edition limited to 700 copies in the United States and 1,400 copies worldwide

Joseph M. Forshaw is one of Australia's leading ornithologists and the author of many acclaimed books, including *Parrots of the World: An Identification Guide* (Princeton). **Albert Earl Gilbert**, one of the world's foremost bird artists, is past president of the Society of Animal Artists. He has illustrated many books, including *Curassows and Related Birds* and the *Reader's Digest Book of North American Birds*.

The Princeton Encyclopedia of American Political History

Edited by Michael Kazin

Rebecca Edwards & Adam Rothman, associate editors

An essential resource for anyone interested in U.S. history and politics, this two-volume encyclopedia covers the major forces that have shaped American politics from the founding to today. Broad in scope, the book addresses both the traditional topics of political history—such as eras, institutions, political parties, presidents, and founding documents—and the wider subjects of current scholarship, including military, electoral, and economic events, as well as social movements, popular culture, religion, education, race, gender, and more.

Each article, specially commissioned for this book, goes beyond basic facts to provide readers with crucial context, expert analysis, and informed perspectives on the evolution of American politics. Written by more than 170 leading historians and social scientists, *The Princeton Encyclopedia of American Political History* gives students, scholars, and researchers authoritative introductions to the subject's most important topics and a first step to further research.

- ◆ Features 190 entries, organized alphabetically and written by a distinguished team of scholars
- ◆ Describes key political periods and eras, from the founding to the present day
- ◆ Traces the history of political institutions, parties, and founding documents
- ◆ Describes the roles of ethnic, racial, and religious groups in the political process
- ◆ Explores the influence of mass culture, from political cartoons to the Internet
- ◆ Includes bibliographies, cross-references, appendixes, a comprehensive index, and more than 50 illustrations and maps

Michael Kazin is professor of history at Georgetown University and an expert in U.S. politics and social movements. His books include *A Godly Hero: The Life of William Jennings Bryan* (Knopf) and *The Populist Persuasion: An American History* (Basic). **Rebecca Edwards** is the Eloise Ellery Professor of History at Vassar College. **Adam Rothman** is associate professor of history at Georgetown University.

THE FIRST NEW ENCYCLOPEDIA
OF U.S. POLITICAL HISTORY
IN MORE THAN TWENTY YEARS

“I can think of no better introduction to American politics than *The Princeton Encyclopedia of American Political History*. The editors, led by the distinguished historian Michael Kazin, have done a superb job of balancing traditional and innovative approaches to their subject and in assembling essays that are authoritative, insightful, and accessible. This work will quickly become an indispensable guide to the political institutions, ideas, issues, and movements that have shaped and sometimes convulsed the United States across its history. A major accomplishment.”
—Gary Gerstle, *Vanderbilt University*
