A Message from the Editor

Welcome to our new catalog. And what better way to start than with *The Crossley ID Guide*. The word “revolutionary” has been cheapened by overuse; but I really cannot think of a better way to describe this book. Forget static, decontextualized images of birds floating in white space on the page. The in-focus scenes on each plate of *The Crossley ID Guide* show birds in all plumages, at varying distances, and in different poses and habitats—as you truly see them in real life. But the book is far more than just an amazing visual feast; it’s a powerful teaching guide, showing how to focus on shape, size, behavior, patterns of color, and probability to identify birds. Above all, Crossley shows that by learning to look you will learn to see, and in the process become a better birder, whatever your level. Comprehensive and stunningly attractive, this guide ushers in a new era of real-life guides. Heady stuff!

Switching gears, we have a bunch of excellent references—local and global. Through detailed maps and graphics, Mike Unwin’s *Atlas of Birds* distills a vast amount of data covering distribution, behavior, and conservation of birds worldwide. At the more local level, Bill Boyle’s *Birds of New Jersey* is an up-to-the-minute summary of the status and distribution of the Garden State’s birds. Richly illustrated with color maps and more than 200 color photographs, it is a much-needed reference for any East Coast birder. *Avian Architecture* is a superbly illustrated guide to the variety of ways in which birds construct nests. Breaking down nests into major types, Peter Goodfellow provides a step-by-step overview of the whole process, using species from around the world, from hornbills to hummingbirds, to illustrate the different building methods. Another beautiful reference is Chris Mattison’s *Frogs and Toads of the World*, an accessible natural history of these charismatic amphibians that is replete with magnificent color photographs. Finally, James Lowen’s *Antarctic Wildlife* is specifically designed for those traveling to the great white continent from southern South America. The guide has a wealth of information on all the wildlife and habitats that you will see, and will help you get the most out of your trip. Have fun!

The Crossley ID Guide

Eastern Birds

Richard Crossley

This stunningly illustrated book from acclaimed birder and photographer Richard Crossley revolutionizes birding by providing the first real-life approach to identification. Whether you are a beginner, expert, or anywhere in between, *The Crossley ID Guide* will vastly improve your ability to identify birds.

Unlike other guides, which provide isolated individual photographs or illustrations, this is the first book to feature large, lifelike scenes for each species. These scenes—640 in all—are each composed of 12–20 color images showing the bird in a wide range of views—near and far, from different angles, in various plumages and behaviors, including flight, and in the habitat in which they live. These beautiful compositions show how a bird's appearance changes with distance, and give equal emphasis to characteristics experts use to identify birds: size, structure and shape, behavior, probability, and color. This is the first book to convey all of these features visually—in a single image—and to reinforce them with accurate, concise text. Each scene provides a wealth of detailed visual information that invites and rewards careful study, but the most important identification features can be grasped instantly by anyone.

By making identification easier, more accurate, and more fun than ever before, *The Crossley ID Guide* will completely redefine how readers look at birds. Essential for all birders, it also promises to make new birders of many people who have despaired of using traditional guides.

Richard Crossley is an internationally acclaimed birder and photographer who has been birding since age 7. He is a coauthor of *The Shorebird Guide*.

March 2011. 544 pages. 10,000 color images. 7 ½ x 10.
Cl: 978-0-691-14778-9 \$35.00 | £24.95

features include

- *The Crossley ID Guide* revolutionizes birding and field guides
- Lifelike scenes composed from multiple color photos of the same species—seen near and far, from different angles, and in various plumages and behaviors, including flight
- Highlights the most important identification characteristics: size, structure and shape, behavior, probability, and color
- Most comprehensive guide available, with 640 scenes incorporating more than 10,000 of the author's images
- An interactive Web site that includes videos—www.crossleybirds.com—helps readers further sharpen and test their identification skills

TURNING BIRDING

"I really can't wait to get my eyes on this thing"—Grant McCreary, *Birders' Library*

"Really cool and totally different... Crossley gives us birds as we see them, in action.... We've been inundated with 'new' birding field guide books in recent years, no single one of them offering a compelling reason for purchase. This book will offer such a reason!"—Jim Williams, *Minneapolis Star Tribune*

"Richard Crossley has conceived and actually implemented a breakout idea for a general field guide to bird identification.... [W]hat ... Crossley is doing with his idea of image, gestalt, wordlessness and recognition is mind-blowing. And it will revolutionize bird ID practice, discussions, and the scope of what each species is. Whether you have seen a bird and want to figure it out or you have been perusing his intuitive selection of what/how a bird looks and then you see it and know it too, I think you'll find Richard's guiding eye a game-changer for your birding endeavors!"—Hawks Aloft

Black Scoter *Melanitta americana* BLSCL L 19m
Common sea duck, often in large flocks mixed with other scoters and ducks. Some migrate inland from urban areas, winter from large, shallow bays. Feeding in shallow water. Can migrate on more barren feeding areas. Waterfowl migration. ♀ gives a raspy, throaty call, often in wintering. ♂ gives a raspy, throaty call, often in wintering. ♀ gives a raspy, throaty call, often in wintering. ♂ gives a raspy, throaty call, often in wintering.

UPSIDE DOWN

This stunningly illustrated book from master birder and photographer Richard Crossley revolutionizes bird-
ing by providing the first real-life approach to identification.

Richard Crossley, internationally acclaimed birder, photographer, and author

“Richard Crossley, in his forthcoming book, *The Crossley ID Guide: Eastern Birds*, has used photography to aid pattern recognition. He has created scenes that depict the way birds actually appear in their natural habitats and by emphasizing the context, he hopes to make it easier for us to perceive the shape and size of birds.”

—Fannie Peczenik, *Pittsburgh Birdwatching Examiner*

Common, and familiar summer visitor to coastal areas (and resident in much of FL). Scattered inland. Winterers in S; numbers increasing rapidly. Often known as fish hawk. Frequently seen hunting diving or carrying fish from lakes, rivers or the ocean. Builds large stick nests on conspicuous man-made nests, towers, often in cacti, hawthorn, and in trees. Pairs often hunt in circles, hovering intermittently. Spectacular plunge-dives, led by male. Frequently hits the water and often comes out empty-handed. Often fishes over the ocean, breast and underlying coverts. Ad ♀ averages darker breast band; juvs superficially similar to adult but with paler fringed upperparts and buff on breast and underlying coverts.

Osprey *Pandion haliaetus* OSPR L 23m

With a foreword by Pete Dunne

Hawks at a Distance Identification of Migrant Raptors Jerry Liguori

“Jerry Liguori’s book takes the hawk identification guide to a whole new level. It is hard to imagine the amount of time that went into this book—countless hours on mountaintops and other hawk-watching sites taking the photographs, then selecting and arranging them. The result is simply the best collection of hawk ID photos ever assembled, combined with Liguori’s clear and concise identification tips. This book is a gold mine of information for anyone interested in hawk identification.”

—David Sibley, author of *The Sibley Guide to Birds*

“Liguori has done it again. Fresh on the heels of his highly acclaimed *Hawks From Every Angle*, we now have the new *Hawks at a Distance*. He never missed a beat. Not only did he pick up where he left off, he has taken it to a higher plane.... It makes a quantum leap in the complex art and science of hawk identification, taming these shape-shifters like never before.”

—Clay Sutton, coauthor of *Hawks in Flight*

The ultimate must-have guide for identifying migrant raptors, *Hawks at a Distance* is the first volume to focus on distant raptors as they are truly seen in the field. Jerry Liguori, a leading expert on North American raptors, factors in new information and approaches for identifying twenty-nine species of raptor depicted in various lighting situations and settings. The field guide’s nineteen full-color portraits, 558 color photos, and 896 black-and-white images portray shapes and plumages for each species from all angles. Useful flight identification criteria are provided and the accompanying text discusses all aspects of in-flight hawk identification, including flight style and behavior. Concentrating on features that are genuinely observable at a distance, this concise and practical field guide is ideal for any aspiring or experienced hawk enthusiast.

Jerry Liguori has been studying raptors throughout North America since 1984. He has conducted hawk migration counts at spring and fall migration sites, such as Cape May Point, Sandy Hook, Derby Hill, Braddock Bay, Whitefish Point, and Dinosaur Ridge, and the Goshute, Wasatch, and Sandia mountains.

April 2011. 216 pages. 558 color photos. 896 halftones. 2 tables. 6 x 8 ½.

Pa: 978-0-691-13559-5 \$19.95 | £13.95

Cl: 978-0-691-13558-8 \$49.50 | £34.95

features include

- The first guide to focus on distant raptors as they are viewed in the field
- New information and approaches for identifying distant raptors
- Illustrates twenty-nine species in various lighting situations and settings
- 558 color photos and 896 black-and-white images depicting plumage and shape characteristics
- All aspects of in-flight hawk identification including flight style and behavior

NEW

The Princeton Field Guide to Dinosaurs

Gregory S. Paul

This lavishly illustrated volume is the first authoritative dinosaur book in the style of a field guide. World-renowned dinosaur illustrator and researcher Gregory Paul provides comprehensive visual and textual coverage of the great Mesozoic animals that gave rise to the living dinosaurs, the birds. Incorporating the new discoveries and research that are radically transforming what we know about dinosaurs, this book is distinguished both by its scientific accuracy and the quality and quantity of its illustrations. It presents thorough descriptions of more than 735 dinosaur species and features more than 600 color and black-and-white images, including unique skeletal drawings, “life” studies, and scenic views—illustrations that depict the full range of dinosaurs, from small, feathered creatures to whale-sized supersauropods.

Heavily illustrated species accounts of the major dinosaur groups are preceded by an extensive introduction that covers dinosaur history and biology, the extinction of nonavian dinosaurs, the origin of birds, and the history of dinosaur paleontology—and that also gives a taste of what it might be like to travel back to the time of the dinosaurs.

The Princeton Field Guide to Dinosaurs is a must-have for anyone who loves dinosaurs, from the amateur enthusiast to the professional paleontologist.

Gregory S. Paul is a leading dinosaur illustrator and researcher who helped establish the “new look” of the Mesozoic creatures seen in contemporary documentaries and movies, including *Jurassic Park*, for which he served as a consultant.

Princeton Field Guides

2010. 320 pages. 150 color illus. 510 line illus. 8 1/2 x 11.

Cl: 978-0-691-13720-9 \$35.00 | £24.95

Not for sale in the Commonwealth (except Canada) and the European Union

features include

- The first authoritative field guide to dinosaurs
- Covers more than 735 species
- Beautiful, large-format volume
- Lavishly illustrated throughout, with more than 600 color and black-and-white drawings and figures, including:
 - More than 130 color life studies, including scenic views
 - Close to 450 skeletal, skull, head, and muscle drawings
 - 8 color paleo-distribution maps
 - Color timeline
- Describes anatomy, physiology, locomotion, reproduction, and growth of dinosaurs, as well as the origin of birds and the extinction of nonavian dinosaurs

The Atlas of Birds

Diversity, Behavior, and Conservation
Mike Unwin

The Atlas of Birds captures the breathtaking diversity of birdlife around the world. This authoritative and full-color atlas features stunning maps that show where birds are found and explain their distribution, with numerous photos and illustrations that showcase the most interesting aspects of bird behavior. Conservation is highlighted throughout, backed up by the very latest findings from BirdLife International on the threats birds face today.

The Atlas of Birds looks at the astonishing variety of behavioral adaptations—from flight and feeding to nest building and song—that have enabled birds to thrive in virtually every habitat on Earth. It covers bird evolution, charts key migratory flyways around the globe, and explores the complex relationship between birds and humans using regional and world maps. This one-of-a-kind atlas explains the different classifications of birds—such as flightless birds, songbirds, seabirds, wildfowl, parrots, and raptors—and includes maps and case studies that illustrate where and why birds are most under threat, and what is being done to protect them.

Mike Unwin is a nature writer and illustrator whose work has appeared in leading publications such as *Bird Watching* and *Birdwatch*.

April 2011. 144 pages. 8 ½ x 11.
Pa: 978-0-691-14949-3 \$22.95 | £15.95

Not for sale in the Commonwealth (except Canada) and the European Union

features include

- The premier illustrated atlas to bird diversity, behavior, and conservation
- Features full-color maps, photos, and diagrams
- Covers bird habitats, evolution, migration, and classification
- Explores the complex relationship between birds and humans
- Illustrates where and why birds are most under threat—and how to protect them

Avian Architecture

How Birds Design, Engineer, and Build
Peter Goodfellow

Birds are the most consistently inventive builders, and their nests set the bar for functional design in nature. *Avian Architecture* describes how birds design, engineer, and build their nests, deconstructing all types of nests found around the world using architectural blueprints and detailed descriptions of the construction processes and engineering techniques birds use. This stunningly illustrated book features 300 full-color images and more than 35 case studies that profile key species worldwide. Each chapter covers a different type of nest, from tunnel nests and mound nests to floating nests, hanging nests, woven nests, and even multiple-nest avian cities. Other kinds of avian construction—such as bowers and harvest wells—are also featured.

Avian Architecture includes intricate step-by-step sequences, visual spreads on nest-building materials and methods, and insightful commentary by a leading expert.

Peter Goodfellow is a retired English teacher and lifelong birdwatcher.

June 2011. 160 pages. 300 color illus. 8 x 10.
Cl: 978-0-691-14849-6 \$27.95
For sale only in the U.S. and Canada

features include

- Illustrates how birds around the world design, engineer, and build their nests
- Features architectural blueprints, step-by-step sequences, visual spreads on nest-building materials and methods, and expert commentary
- Includes 300 full-color images

The Birds of New Jersey

Status and Distribution

William J. Boyle, Jr.

Kevin T. Karlson, photographic editor

features include

- Most up-to-date field guide for New Jersey and surrounding region
- All bird species known to the state
- Species accounts describe the preferred habitat and abundance of species
- Range maps in color detail seasonal distribution
- For migratory birds, spring and fall migration times indicated
- More than 200 color photographs of rare and common species

"Species for species and spectacle for spectacle, few states can match New Jersey's celebrated bird life and no state enjoys a richer or more enduring ornithological tradition. Meticulously researched, intelligently organized, and clear and lucid in its presentation, William Boyle's new book is nothing less than the sum of our knowledge concerning the state of birds in New Jersey. If you live in or visit New Jersey, if the study or enjoyment of birds is a thread that runs through the fabric of your life, then you simply must own a copy of this book—or two! One for the library. One for the bedside table. It will save you steps and wear and tear on this newly published classic."

—Pete Dunne, CCO, New Jersey Audubon

New Jersey provides some of the most varied and exciting birding in North America, and more than 450 species have been recorded in the state. Yet there has been no comprehensive and readily available guide for all these species—until now. *The Birds of New Jersey* is the most up-to-date and succinct field guide for the birds of New Jersey and includes all species known to the state from historical times to the present. Featuring over 200 color photos of rarities and regular species, this authoritative guide provides individual entries that include summary of status and seasonal distribution, and comments on changes over time. Detailed color-coded maps accompany species accounts, and for species recorded five or fewer times, dates and locations of each record are noted. The introduction examines the state's geography, the history of bird records, and background information to species accounts, and the extensive bibliography guides birders to original sources used in the book. This is the essential resource for birders, ornithologists, and nature enthusiasts interested in the birds of New Jersey and the greater surrounding region.

William J. Boyle, Jr., has been birding throughout the world for more than forty years.

June 2011. 352 pages. 202 color photos. 460 maps. 6 x 9.

Pa: 978-0-691-14410-8 \$24.95 | £16.95

Antarctic Wildlife

A Visitor's Guide

James Lowen

Antarctic Wildlife is the definitive identification guide to the birds and marine mammals of the Antarctic Peninsula, Drake Passage, and Beagle Channel. This easy-to-use photographic field guide enables visitors to this unique region of the world—newcomer and seasoned traveler alike—to identify with confidence the penguins, whales, seals, seabirds, and other stunning wildlife they encounter on their journey. Full-color photographs show typical views of each species of bird or marine mammal, together with the terrestrial plants likely to be seen. Detailed species accounts describe key identification features, give tips on where to look, and highlight interesting facts. This one-of-a-kind guide also includes introductory chapters that cover the wildlife of each Antarctic environment by season as well as information on tourism and Antarctic cruising that will help visitors get the most from their trip.

Antarctic Wildlife is a must-have photographic guide for travelers taking the standard cruise from Ushuaia, Argentina, to the great white continent, and for anyone interested in the diverse wildlife found in this remote part of the world.

James Lowen is a wildlife writer, photographer, and lecturer. An Antarctic naturalist guide for Polar Star Expeditions, he lives in Argentina.

June 2011. 240 pages. 159 color photos. 5 x 8.

Pa: 978-0-691-15033-8 \$22.95 | £15.95

Not for sale in the European Union or the Falkland Islands

features include

- Covers the wildlife of the Antarctic Peninsula, Drake Passage, and Beagle Channel
- Features full-color photographs throughout
- Describes key identification features and gives tips on where to look
- Includes an introduction to Antarctic environments and information on Antarctic cruising

Frogs and Toads of the World

Chris Mattison

With nearly 6,000 species currently identified, frogs and toads are the most familiar and abundant amphibians on the planet. *Frogs and Toads of the World* is a comprehensive guide to the natural history of this large and diverse group of creatures. Stunningly illustrated throughout with 200 color photographs, this one-of-a-kind book traces the evolution and classification of frogs and toads, providing detailed information about each of the 49 unique families and highlighting distinctive and notable species. It vividly describes their remarkable diversity in shape, color, and markings; anatomy and development; life cycle; habitats; the various methods they use to attract mates and hunt for food; and the physiological and behavioral tricks they use to survive and thrive around the world.

features include

- A comprehensive guide to the natural history of frogs and toads
- Features 200 stunning color photographs
- Covers each of the 49 unique frog families
- Describes anatomy, life cycle, habitats, survival tricks, and more

This indispensable guide also explores frogs' interaction with humans, from modern-day collection for the meat trade, scientific research, and the trade in exotic pets to how their survival is being threatened by habitat destruction, climate change, and disease.

Chris Mattison is a natural history writer and photographer who specializes in reptiles and amphibians. His photography regularly appears in books and magazines throughout the world.

June 2011. 192 pages. 200 color photos. 7 1/2 x 10.
Cl: 978-0-691-14968-4 \$29.95

For sale only in North, Central, and South America, and the Caribbean

Trees of Panama and Costa Rica

Richard Condit, Rolando Pérez & Nefertaris Daguerre

This is the first field guide dedicated to the diverse tree species of Panama and Costa Rica. Featuring close to 500 tropical tree species, *Trees of Panama and Costa Rica* includes superb color photos, abundant color distribution maps, and concise descriptions of key characteristics, making this guide readily accessible to botanists, biologists, and casual nature lovers alike.

The invaluable introductory chapters discuss tree diversity in Central America and the basics of tree identification. Family and species accounts are treated alphabetically and describe family size, number of genera and species, floral characteristics, and relative abundance. Color distribution maps supplement the useful species descriptions, and facing-page photographic plates detail bark, leaf, flower, or fruit of the species featured. Helpful appendices contain a full glossary, a comprehensive guide to leaf forms, and a list of families not covered.

Richard Condit is a staff scientist at the Smithsonian Tropical Research Institute in Panama. Rolando Pérez is chief botanist and Nefertaris Daguerre is a forest specialist with the Center for Tropical Forest Science at the STRI.

Seeds of Amazonian Plants

Fernando Cornejo & John Janovec

Seeds of Amazonian Plants is the first field guide to treat the extraordinary diversity of seeds and diaspores of plants commonly encountered in the Amazon and other lowland moist forests of the American tropics. This stunningly illustrated guide features an easy-to-use whole-plant approach to seed identification that provides detailed descriptions not only of the seeds but also of the habit, trunk, bark, leaves, infructescence, and fruit of Amazonian plants, as well as information about the known uses and distribution of each genus. Presenting these descriptions together with 750 full-color photos and a unique identification key, this premier field guide enables users to identify seeds of 544 genera and 131 families of plants.

Fernando Cornejo is research associate and field research botanist at the Botanical Research Institute of Texas. John Janovec is research botanist and founding director of the Andes to Amazon Biodiversity Program at the Botanical Research Institute of Texas.

2010. 192 pages. 750 color illus. 6 x 9.
Pa: 978-0-691-14647-8 \$35.00 | £24.95
Cl: 978-0-691-11929-8 \$75.00 | £52.00

features include

- The most comprehensive field guide to the birds of the Middle East
- Includes detailed species accounts and 820 color distribution maps

NEW—SECOND EDITION

Birds of the Middle East

Richard Porter & Simon Aspinall

Birds of the Middle East is now the most field-ready and comprehensive guide to the fantastic birds of this region. This fully revised and updated second edition covers all species—including vagrants—found in the Arabian Peninsula (including Socotra), Jordan, Lebanon, Israel, Syria, Iraq, Iran, Turkey, and Cyprus. It features 176 superb color plates depicting more than 800 species, as well as 820 color distribution maps that show the breeding range for almost every species. In this upgraded edition, maps and detailed species accounts are now located opposite the plates, making this stunningly illustrated field guide easier to use than ever.

Richard Porter has had a long association with the Middle East and is an adviser on bird conservation for BirdLife International. Simon Aspinall is a lifelong birder who lives in the United Arab Emirates.

2010. 400 pages. 176 color plates. 820 maps. 5 1/2 x 8 1/2.
Pa: 978-0-691-14844-1 \$39.50 | £27.95

Parrots of the World

Joseph M. Forshaw

Illustrated by Frank Knight

From the macaws of South America to the cockatoos of Australia, parrots are among the most beautiful and exotic birds in the world—and also among the most endangered. This stunningly illustrated, easy-to-use field guide covers all 356 species and well-differentiated subspecies of parrots, and is the only guide organized by geographical distribution—Australasian, Afro-Asian, and neotropical. It features 146 superb color plates depicting every kind of parrot, as well as detailed, facing-page species accounts that describe key identification features, distribution, subspeciation, habitat, and status. Color distribution maps show ranges of all subspecies, and field identification is further aided by relevant upperside and underside flight images. This premier field guide also shows where to observe each species in the wild, helping make this the most comprehensive and user-friendly guide to the parrots of the world.

Joseph M. Forshaw is one of Australia's foremost ornithologists and a world-renowned expert on parrots. Frank Knight has been an illustrator for three decades, producing artwork for scientific papers, books, and lectures.

2010. 328 pages. 146 color plates. 2 line illus. 391 maps. 6 x 9.

Pa: 978-0-691-14285-2 \$29.95 | £20.95

Not for sale in Australia and New Zealand

features include

- The only parrot guide to focus on geographical distribution
- Covers all 356 species
- Provides detailed facing-page species accounts that describe key identification features, distribution, subspeciation, habitat, and status
- Includes color distribution maps

NEW

Nightjars, Potoos, Frogmouths, Oilbird, and Owllet-nightjars of the World

Nigel Cleere

"This will be the world's go-to reference book for all things nightjar."

—*Idaho Birding Blog*

"The best bird book I've seen all year... This book is a comprehensive photographic guide (check out the crazy variations these birds come in), but also gives information about this poorly understood group of birds in an easy to read fashion... This book will appeal to hardcore and intermediate birders alike because this is a fascinating family of birds to study and the photos are incredible."

—Sharon Stiteler, *Birdchick.com*

This is the ultimate identification guide to the nightjars, potoos, frogmouths, Oilbird, and owllet-nightjars of the world. Covering all 135 known species of these elusive and cryptically plumaged birds, this illustrated guide features more than 580 superb color photographs depicting every species and many subspecies, including numerous images never before published.

Nigel Cleere is an ornithologist and expert on nightjars and related species.

2010. 464 pages. 580+ color photos. 135 color maps. 7 x 10.

Birds of the West Indies

Written and illustrated by
Norman Arlott

The West Indies, stretching from Grand Bahama in the north to Grenada in the south, is home to more than 550 bird species. *Birds of the West Indies* is the complete guide for identifying all of the diverse birds in these island

territories. The guide's 80 vivid color plates are accompanied by succinct text focusing on key field-identification characteristics, and distribution maps for all species are conveniently located at the back of the guide for handy reference.

Birds of the West Indies is the perfect companion for birders, wildlife enthusiasts, and holiday-seekers interested in this area of the world.

Norman Arlott is one of the world's leading bird artists.

2010. 240 pages. 80 color plates. 550+ maps. 5 x 7 1/2.

One of the “Year’s Best Gardening Books” for 2009, *Washington Post*

Birds of North America
The Photographic Guides
Paul Sterry & Brian E. Small

“Whether you are a birding fanatic or someone who enjoys looking in their backyard to see what shows up, there is a new bird guide that will fill your need... With great photos of more than 500 species, this is a wonderful photographic guide making identification of birds that much easier.”
—Ken Moran, *New York Post*

“Informative and accessible text, up-to-date maps, and stunning color photographs. Images have been carefully selected to convey both the sheer beauty and the key identification features of each bird, and many of the photos are larger than those found in most other guides.”
—*Ornithological Newsletter*

“Photos are tack-sharp, and tightly cropped, giving close-up views of each bird.”
—Matt Mendenhall, *Birder’s World*

“Stunning. This was the first word that came to mind upon cracking open these new guides.... The photography alone is worth owning both Eastern and Western editions. Even so, the accompanying text is fantastic too.”
—Eddie Callaway, *Birdfreak.com*

Birds of Eastern North America

2009. 336 pages. 1,118 color photos. 405 maps. 5 ½ x 8.

Wildlife of the Galápagos

Julian Fitter, Daniel Fitter & David Hosking

"[Today] you'll find more than a dozen recent field guides to the wildlife of this most famous of archipelagos. But of the general guides, *Wildlife of the Galápagos* is by far the most complete and convenient. Well-organized, nicely illustrated and clearly written, it manages the delicate balance between breadth and depth, while covering all major groups of both land and marine animals and plants."

—Adrian Barnett, *New Scientist*

2002. 256 pages. 400 color illus. 4 ½ x 7 ½.

Pa: 978-0-691-10295-5 \$19.95

For sale only in the U.S., Canada, and the Philippines

The Kingdon Pocket Guide to African Mammals

Jonathan Kingdon

"Jonathan Kingdon loves biology and art. This felicitous combo delivers a delightful book.... His knowledge is impressive, and his drawings and paintings wonderful, full of information and character.... A great guide, from leaf-plucking gelada to long-eared hedgehog. Take it to any African country."

—Maggie McDonald, *New Scientist*

2005. 272 pages. 115 color plates. 400 color illus. 250 maps. 5 x 8.

Pa: 978-0-691-12239-7 \$24.95 | £16.95

FORTHCOMING PAPERBACK

Owlet Caterpillars of Eastern North America

David L. Wagner

This lavishly illustrated field guide features more than 800 species of the most common, interesting, beautiful, and important owlet (noctuid) caterpillars found in eastern North America. More than 2,100 color photographs include numerous stunning images and the guide's introductory sections offer a wealth of information on noctuid natural history, morphology, larval diets, natural enemies, and classification; suggestions for finding and rearing owlet caterpillars; and much more. The 375 full-page species accounts treat similar species, range, phenology, and larval foodplants.

David L. Wagner is professor of ecology and evolutionary biology at the University of Connecticut.

June 2011. 576 pages. 2,100+ color photos. 8 x 10.
Pa: 978-0-691-15042-0 \$29.95 | £20.95

FORTHCOMING PAPERBACK

The Private Life of Spiders

Paul Hillyard

"Hillyard is a true spider devotee, and he cheerfully informs us that there is no escape from his subject.... *The Private Life of Spiders* is a stroll through their largely hidden world, highlighting the most spectacular, unusual, and instructive of the

eight-legged brethren."

—Tim Flannery, *New York Review of Books*

Paul Hillyard is a leading authority on spiders and a former curator at London's Natural History Museum.

June 2011. 160 pages. 200 color illus. 7 ½ x 9 ½.
Pa: 978-0-691-15003-1 \$19.95

Not for sale in the Commonwealth (except Canada) and the European Union

WorldTwitch 2005 Best Butterfly Book to Date

Butterflies of the East Coast

An Observer's Guide

Rick Cech & Guy Tudor

"I recommend this book in the highest terms."

—*American Butterflies*

2007. 360 pages. 878 color illus. 275 maps. 8 ½ x 11.
Pa: 978-0-691-09056-6 \$32.95 | £22.95

FORTHCOMING

Tropical Ecology

John Kricher

This full-color illustrated textbook offers the first comprehensive introduction to all major aspects of tropical ecology. It explains why the world's tropical rain forests are so universally rich in species, what factors may contribute to high species richness, how nutrient cycles affect rain forest ecology, and how ecologists investigate the complex interrelationships among tropics flora and fauna.

John Kricher is professor of biology at Wheaton College in Massachusetts.

April 2011. 704 pages. 661 color illus. 10 line illus. 8 x 10.
Cl: 978-0-691-11513-9 \$85.00 | £59.00

FORTHCOMING PAPERBACK

25TH ANNIVERSARY EDITION

With a new foreword by Dale Jamieson

Respect for Nature

A Theory of Environmental Ethics

Paul W. Taylor

"When it first appeared, *Respect for Nature* was at once recognized for the important, groundbreaking work it was. It was deservedly a major influence in the then-newly developing field of environmental ethics. Time has only confirmed this first opinion and it is good to have the book back before us."

—Michael Ruse, editor of *Philosophy after Darwin*

Paul W. Taylor is professor emeritus of philosophy at Brooklyn College, City University of New York.

May 2011. 360 pages. 5 1/2 x 8 1/2.
Pa: 978-0-691-15024-6 \$24.95 | £16.95

NEW

Honeybee Democracy

Thomas D. Seeley

"*Honeybee Democracy* is a wonderful book, beautifully written and illustrated, about humanity's greatest friend among the insects. The honeybee is important not only for its role in agriculture but for what it has taught us concerning the fundamental nature of complex social organization. Seeley, its leading authority, here presents it to a broad readership, with scientific exactitude written in lyrical prose."

—Edward O. Wilson, coauthor of *The Superorganism*

Thomas D. Seeley is professor of biology at Cornell University and a passionate beekeeper.

2010. 280 pages. 30 color illus. 30 halftones. 26 line illus. 1 table. 8 x 9.
Cl: 978-0-691-14721-5 \$29.95 | £20.95

FORTHCOMING PAPERBACK

How and Why Species Multiply

The Radiation of Darwin's Finches

Peter R. Grant & B. Rosemary Grant

"The Grants' account makes exciting and lucid reading."

—Hanna Kokko, *Science*

Peter R. Grant and B. Rosemary Grant are professors emeriti at Princeton University.

Princeton Series in Evolutionary Biology

July 2011. 256 pages. 120 color illus. 46 line illus. 3 tables. 6 x 9.
