A Sparrowhawk's Lament

How British Breeding Birds of Prey Are Faring

David Cobham with Bruce Pearson

With a foreword by Chris Packham

Britain is home to fifteen species of breeding birds of prey, from the hedgerow-hopping Sparrowhawk to the breathtaking White-tailed Eagle. In this handsomely illustrated book, acclaimed British filmmaker and naturalist David Cobham offers unique and deeply personal insights into Britain's birds of prey and how they are faring today. He delves into the history of these marvellous birds and talks in depth with the scientists and conservationists who are striving to safeguard them. In doing so, he profiles the writers, poets, and filmmakers who have done so much to change the public's perception of birds of prey. Thanks to popular television programs, the Victorian myth that any bird with a hooked beak is evil has been dispelled. However, although there are success stories—five birds of prey that were extinct have become reestablished with viable populations—persecution is still rife: so much so that one bird of prey, the Hen Harrier, became virtually extinct in England as a breeding bird in 2013.

Featuring drawings by famed wildlife artist Bruce Pearson, this book reveals why we must cherish and celebrate our birds of prey, and why we neglect them at our peril. In *A Sparrowhawk's Lament*, you will learn how the perfection of the double-barrelled shotgun sounded a death knell for British birds of prey in the nineteenth century, how the conscription of gamekeepers during two world wars gave them a temporary reprieve, how their fortunes changed yet again with the introduction of agricultural pesticides in the 1950s, why birds of prey are vital to Britain's ecosystems and cultural heritage—and much more.

2014. 272 pages, 97 line illus. 6 x 8 ½.

Third Edition

Britain's Dragonflies

A Field Guide to the Damselflies and Dragonflies of Britain and Ireland

Dave Smallshire & Andy Swash

"That *Britain's Dragonflies* is on its third edition already is a sure sign of how well regarded and popular this field guide has become since its first publication in 2004. This edition takes the guide a stage further than the previous two and has been thoroughly updated and revised with new photographs, text, and up-to-date distribution maps... This is the definitive, must have guide to the dragonflies of Britain and Ireland and as the most comprehensive field guide of its type, it will surely find a place on the bookshelves of all keen dragonfly watchers and those with a more general interest in the wildlife of Great Britain. Highly Recommended."

—Mark Tyrrell, *British Dragonflies*

"The deluge of information is well presented and a subject that could easily daunt a budding odonatologist is in fact made entirely digestible. If you haven't already got a copy, it's well worth investing ... in this revamped edition of *Britain's Dragonflies* to ensure that you're in good stead for a summer of insect-watching."

—Josh Jones, BirdGuides.com

Britain's Dragonflies is the only comprehensive photographic field guide to the damselflies and dragonflies of Britain and Ireland. Written by two of Britain's foremost experts, this fully revised and updated edition features hundreds of stunning images and identification charts covering all 56 resident, migrant and former breeding species, and seven potential vagrants. The book focuses on identification—both of adults and larvae—highlighting the key features. Detailed species profiles provide concise information on identification, distribution, flight periods, behaviour, habitat, status and conservation. Other sections cover biology; how to watch, photograph, record and monitor Dragonflies; conservation status and legislation; and introduced exotic species.

Britain's Wildlife

2014. 224 pages. 453 colour photos. 321 colour illus. 66 maps. 6 x 8.

Pa: 978-0-691-16123-5 £17.95 | \$25.95

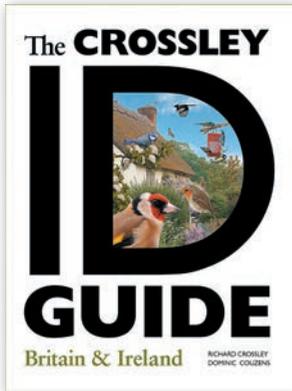

- Beautiful colour plates showing males, females, immatures and all colour forms for every species
- Over 450 stunning photographs and 550 illustrations
- Up-to-date species profiles and distribution maps
- Detailed, easy-to-use identification charts for adults and larvae

- Lifelike images of birds from near to far
- A celebration of the British and Irish countryside
- A teaching and field guide and essential reference
- Concise and compelling text by Dominic Couzens and Richard Crossley

New

One of the *Guardian's* Best Nature Books of 2013

The Crossley ID Guide

Britain and Ireland

Richard Crossley & Dominic Couzens

"[A] revolutionary new bird book."

—Stephen Moss, *Guardian*

"Bright, bold, clean-looking and easy to use, it is not just an identification guide—it is a celebration of our birds and how they fit into our landscape."

—Andy Stoddart

"Richard Crossley and Dominic Couzens have lifted the field guide out of the rut and produced a first class book."

—*Biggest Twitch*

This guide is a celebration of the beauty of birds and the British and Irish countryside. Aimed at beginner and intermediate birders, yet suitable for all levels, this new volume in the groundbreaking *Crossley ID Guide* series is the most user-friendly guide to the birds of Britain and Ireland. Following *The Crossley ID Guides'* award-winning design, this book looks at all regularly occurring species in Britain and Ireland, and shows readers how to identify birds in their natural habitats using size, structure, shape, probability, and behaviour—just like the experts do! Stunning images are accompanied by the colourful and compelling text of Dominic Couzens, one of Britain's leading nature writers.

This unique book treats more than 300 species—all the regularly occurring birds likely to be encountered by observers—and the guide's attractive pages provide a real-life approach to bird identification. Beautiful, in-focus scenes present birds in various plumages and in lifelike poses set in identifiable British and Irish habitats. The plates also illustrate how a bird's appearance changes with distance. Organising images in cohesive, easy-to-understand plates rather than as separate photographs, this book also sets itself apart by containing more images that demonstrate flight, behaviour, habitat, and plumages than any other volume available. Not only is this field guide a reference book, it is also a spectacular teaching resource that makes it easy for nature enthusiasts to see and appreciate the big picture of bird identification.

The Crossley ID Guides

2013. 304 pages. 300+ colour plates. 250 maps. 6 x 9.

Forthcoming—Second Edition

Birds of New Guinea

Thane K. Pratt & Bruce M. Beehler

John C. Anderton & Szabolcs Kókay

Praise for the first edition:

“This book is not only indispensable to any bird-watcher visiting New Guinea and the adjacent islands, but, owing to the wealth of its information, it will be of great interest to anyone who is seriously interested in birds.”

—*American Scientist*

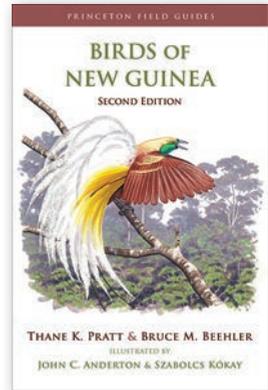

This is the completely revised edition of the essential field guide to the birds of New Guinea. The world’s largest tropical island, New Guinea boasts a spectacular avifauna characterized by cassowaries, megapodes, pigeons, parrots, cuckoos, kingfishers, and owl-nightjars, as well as an exceptionally diverse assemblage of songbirds such as the iconic birds of paradise and bowerbirds. *Birds of New Guinea* is the only guide to cover all 780 bird species reported in the area, including 366 found nowhere else in the world. Expanding its coverage with 111 vibrant colour plates—twice as many as the first edition—and the addition of 635 range maps, the book also contains updated species accounts with new information about identification, voice, habits, and range. From ecotourists to field researchers, *Birds of New Guinea* remains an indispensable reference to the bird diversity of this remarkable region.

Princeton Field Guides

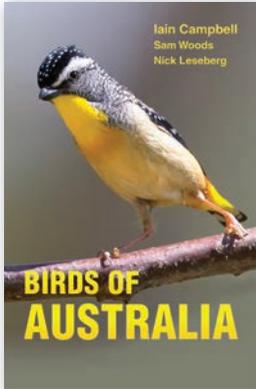

November 2014. 512 pages. 111 colour illus. 24 line illus. 635 maps. 6 x 9.

Birds of Australia
A Photographic Guide
Iain Campbell, Sam Woods & Nick Leseberg
With photography by Geoff Jones

"Birds of Australia is an excellent book. The text is comprehensive, the content is effectively organized and researched, and the scholarship is sound. The photographic plates are of a very high quality."

—Peter S. Lansley, senior ecologist, Brett Lane & Associates

Australia is home to a spectacular diversity of birdlife, from parrots and penguins to emus and vibrant passerines. *Birds of Australia* covers all 714 species of resident birds and regularly occurring migrants and features more than 1,100 stunning colour photographs, including many photos of subspecies and plumage variations never before seen in a field guide. Detailed facing-page species accounts describe key identification features such as size, plumage, distribution, behavior, and voice. This one-of-a-kind guide also provides extensive habitat descriptions with a large number of accompanying photos. The text relies on the very latest IOC taxonomy and the distribution maps incorporate the most current mapping data, making this the most up-to-date guide to Australian birds.

December 2014. 392 pages. 1,100+ colour photos. 6 x 9 1/2.
Pa: 978-0-691-15727-6 £24.95 | \$35.00

- Covers all 714 species of resident birds and regularly occurring migrants
- Features more than 1,100 stunning colour photos
- Includes facing-page species accounts, habitat descriptions, and distribution maps
- The ideal photographic guide for beginners and seasoned birders alike

Britain's Habitats

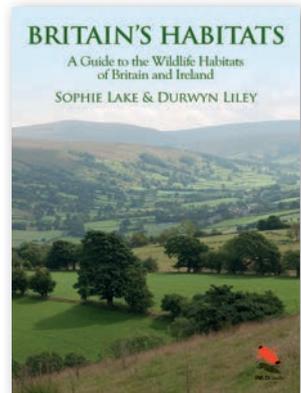

A Guide to the Wildlife Habitats of Britain and Ireland

Sophie Lake & Durwyn Liley

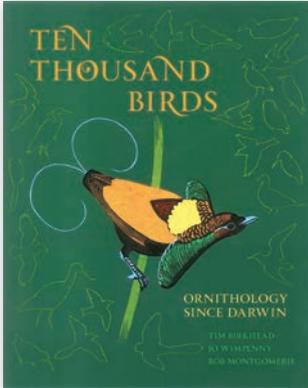

A photographic guide to habitats, this lavishly illustrated book provides a comprehensive overview of the natural history and conservation landscape of Britain and Ireland. In essence a field guide, the book leads the reader through all the main habitat types, with information on their characteristics, extent, geographical variation, key species, cultural importance, origins and conservation. It aims to help visitors to the countryside recognize the habitats around them, understand how they have evolved and what makes them special, and imagine how they might change in the future.

This book is the perfect companion for anyone travelling in Britain and Ireland, and essential reading for all wildlife enthusiasts, professional ecologists and landscape architects.

December 2014. 256 pages. 500 colour photos. 5 tables. 70 maps. 7 ½ x 10.
Cl: 978-0-691-15855-6 £27.95 | \$39.95

- Individual sections on all the main habitat types found in Britain and Ireland
- Some 500 evocative colour photographs, including images from around Britain and Ireland in all seasons
- Details and photographs of key species and features associated with the different habitats

"An excellent history of the study of birds in modern times."

—Matt Merritt, *Bird Watching*

"A first-class review not only of the recent history of ornithology but also of the key players involved. No other book of this type comes anywhere near this one in its breadth of coverage and depth of scholarship. *Ten Thousand Birds* is in a class by itself, and an outstanding read."

—Ian Newton, author of *The Migration Ecology of Birds*

New

Ten Thousand Birds

Ornithology since Darwin

Tim Birkhead, Jo Wimpenny & Bob Montgomerie

Ten Thousand Birds provides a thoroughly engaging and authoritative history of modern ornithology, tracing how the study of birds has been shaped by a succession of visionary and often-controversial personalities, and by the unique social and scientific contexts in which these extraordinary individuals worked. This beautifully illustrated book opens in the middle of the nineteenth century when ornithology was a museum-based discipline focused almost exclusively on the anatomy, taxonomy, and classification of dead birds. It describes how in the early 1900s pioneering individuals such as Erwin Stresemann, Ernst Mayr, and Julian Huxley recognized the importance of studying live birds in the field, and how this shift thrust ornithology into the mainstream of the biological sciences. The book tells the stories of eccentrics like Colonel Richard Meinertzhagen, a pathological liar who stole specimens from museums and quite likely murdered his wife, and describes the breathtaking insights and discoveries of ambitious and influential figures such as David Lack, Niko Tinbergen, Robert MacArthur, and others who through their studies of birds transformed entire fields of biology.

Ten Thousand Birds brings this history vividly to life through the work and achievements of those who advanced the field. Drawing on a wealth of archival material and in-depth interviews, this fascinating book reveals how research on birds has contributed more to our understanding of animal biology than the study of just about any other group of organisms.

2014, 544 pages. 94 colour illus. 60 halftones. 8 x 10.
Cl: 978-0-691-15197-7 £29.95 | \$45.00

New

Wildlife of the Caribbean

Herbert A. Raffaele & James W. Wiley

“This well-organized book is an exemplary resource on Caribbean wildlife. It fills a major gap in the literature for lay audiences and is most welcome.”

—Catherine Levy, Windsor Research Centre, Jamaica

This is the first comprehensive illustrated guide to the natural world of the Caribbean islands. It contains 600 vivid colour images featuring 451 species of plants, birds, mammals, fish, seashells, and much more. While the guide primarily looks at the most conspicuous and widespread species among the islands, it also includes rarely seen creatures—such as the Rhinoceros Iguana and Cuban Solenodon—giving readers a special sense of the region’s diverse wildlife.

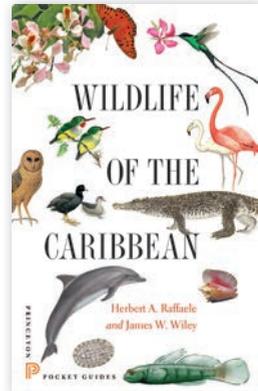

Each species is represented by one or more colour photos or illustrations; details regarding its identification, status, and distribution; and interesting aspects of its life history or relationship to humans. In addition, an introductory section focuses on the unique characteristics of the Caribbean’s fauna and flora, the threats faced by both, and some of the steps being taken to sustain the area’s extraordinary natural heritage.

Wildlife of the Caribbean is the essential field guide for learning about the living wonders in this area of the world.

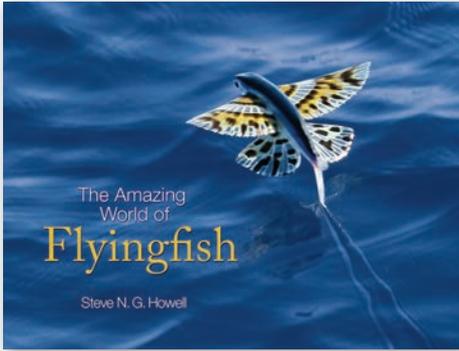

Princeton Pocket Guides

2014. 304 pages. 600 colour illus. 1 map. 5 x 8.

Pa: 978-0-691-15382-7 £13.95 | \$19.95

- The only guide of its kind for the Caribbean islands
- 600 detailed colour images feature 451 amazing species
- Straightforward descriptions suitable for general audience
- Compact size makes the guide easy to carry

Forthcoming
The Amazing World of Flyingfish
Steve N. G. Howell

If you travel the open ocean anywhere in the tropics, you are very likely to see flyingfish. These beautifully coloured “ocean butterflies” shoot out of the water and sail on majestic, winglike pectoral fins to escape from predators such as dolphins, swordfish, and tuna. Some can travel for more than six hundred feet per flight. Yet despite their prevalence in warm ocean waters and their vital role in the tropical food chain, surprisingly little is known about flyingfish—more than 60 species are said to exist, but nobody is sure

“For those readers who have never ventured onto a tropical sea and don’t yet believe that fish can fly, prepare to be dazzled by Howell’s stunning photographs and to be amazed and charmed by flyingfish.”

—Robert L. Pitman, National Oceanic and Atmospheric Administration

of the number. This beautifully illustrated book presents flyingfish as you’ve never seen them before. It features more than 90 stunning colour photos by renowned naturalist Steve Howell, as well as a concise and accessible text that explores the natural history of flyingfish, where they can be found, how and why they fly, what colours they are, what they eat and what eats them, and more.

The ideal gift for fish lovers, seasoned travellers, and armchair naturalists alike, this first-of-its-kind book provides a rare and incomparable look at these spectacular marine creatures.

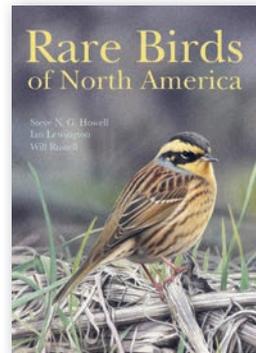

July 2014. 64 pages. 94 colour photos. 8 x 6.
Cl: 978-0-691-16011-5 £8.95 | \$12.95

New
Rare Birds of North America
Steve N. G. Howell, Ian Lewington & Will Russell

Rare Birds of North America is the first comprehensive illustrated guide to the vagrant birds that occur throughout the United States and Canada. Featuring 275 stunning colour plates, this book covers 262 species originating from three very different regions—the Old World, the New World tropics, and the world’s oceans. It explains the causes of avian vagrancy and breaks down patterns of occurrence by region and season, enabling readers to see where, when, and why each species occurs in North America. Detailed species accounts describe key identification features, taxonomy, age, sex, distribution, and status.

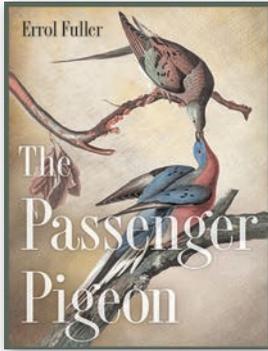

Rare Birds of North America provides unparalleled insights into vagrancy and avian migration, and will enrich the birding experience of anyone interested in finding and observing rare birds.

2014. 448 pages. 275 colour plates. 2 line illus. 9 tables. 17 maps. 7 x 9 ½.
Cl: 978-0-691-11796-6 £24.95 | \$35.00

“Rare Birds of North America is splendid. There is warmth and humour in the prose, and the colour plates are stunning.”

—Edward S. Brinkley, editor of *North American Birds*

Forthcoming
The Passenger Pigeon
Errol Fuller

This stunningly illustrated book tells the astonishing story of North America's Passenger Pigeon, a bird species that—like the Tyrannosaur, the Mammoth, and the Dodo—has become one of the great icons of extinction. Errol Fuller describes how these fast, agile, and handsomely plumed birds were immortalized by the ornithologist and painter John James Audubon, and captured the imagination of writers such as James Fenimore Cooper, Henry David Thoreau, and Mark Twain. He shows how widespread deforestation, the demand for cheap and plentiful pigeon meat, and the indiscriminate killing of Passenger Pigeons for sport led to their catastrophic decline. Fuller provides an evocative memorial to a bird species that was once so important to the ecology of North America, and reminds us of just how fragile the natural world can be.

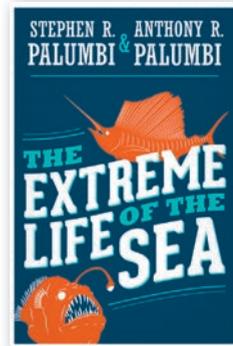

November 2014. 192 pages. 75 colour illus. 25 halftones. 7 x 9 ½.
Cl: 978-0-691-16295-9 £19.95 | \$29.95

New
The Extreme Life of the Sea
Stephen R. Palumbi & Anthony R. Palumbi

The ocean teems with life that thrives under difficult situations in unusual environments. *The Extreme Life of the Sea* takes readers to the absolute limits of the ocean world—the fastest and deepest, the hottest and oldest creatures of the oceans. It dives into the icy Arctic and boiling hydrothermal vents—and exposes the eternal darkness of the deepest undersea trenches—to show how marine life thrives against the odds. This thrilling book brings to life the sea's most extreme species, and tells their stories as characters in the drama of the oceans. Coauthored by Stephen Palumbi, one of today's leading marine scientists, *The Extreme Life of the Sea* tells the unforgettable tales of some of the most marvellous life forms on Earth, and the challenges they overcome to survive. Modern science and a fluid narrative style give every reader a deep look at the lives of these species.

2014. 256 pages. 16 colour illus. 28 halftones. 5 line illus. 6 x 9.
Cl: 978-0-691-14956-1 £19.95 | \$27.95

An enhanced e-book is available. This special edition includes eleven videos and is priced at £20.95 | \$29.99.

"The oceans are our most precious treasure, full of creatures and stories more fantastic than any science fiction. *The Extreme Life of the Sea* is a fascinating exploration of this vast mysterious universe. Wonderfully written, it will grab you from page one and carry you all the way through. A must-read for everyone."
—Philippe Cousteau

New

Birds of Kenya's Rift Valley **Adam Scott Kennedy**

Kenya's Rift Valley includes four major national parks—Lake Nakuru, Lake Bogoria, Mount Longonot, and Hell's Gate—as well as many smaller areas that are outstanding for wildlife. *Birds of Kenya's Rift Valley* features the 320 bird species that are most likely to be encountered on safari in this world-famous region, which runs from Lake Baringo in the north to Lake Magadi in the south. Featuring over 500 stunning colour photos, this beautiful guide breaks new ground with its eye-catching layout and easy-to-use format. The book follows a habitat-based approach and provides interesting information about the ecology and behaviours of each species. *Birds of Kenya's Rift Valley* avoids technical jargon in the species descriptions, which makes the guide easily accessible to anyone. With it, you will be identifying birds in no time.

Wildlife Explorer Guide

2014. 256 pages. 500 colour photos. 6 x 8.

Pa: 978-0-691-15907-2 £18.95 | \$29.95

- Stunning photos of 320 bird species
- Major plumage variations depicted
- Jargon-free text
- Helpful notes on what to look and listen for, behaviour, and why some birds are so named

A Field Guide to the Larger Mammals of Tanzania

**Charles Foley, Lara Foley, Alex Lobora, Daniela De Luca,
Maurus Msuha, Tim R. B. Davenport & Sarah Durant**

Tanzania offers some of the finest wildlife watching in the world. Its protected areas, which include the iconic Serengeti National Park, Ngorongoro Crater, and Mount Kilimanjaro, are famous for their density and diversity of large mammals. This field guide covers all the larger mammals of Tanzania, including marine mammals. Detailed accounts are provided for more than 135 species, some of which have only recently been discovered, and include superb colour photos, colour illustrations of marine mammals, and up-to-date distribution maps. Accounts for the land mammals give information on identification; similar species; habitats and social behaviour; distribution; population, status, and threats; and where best to look for the species. The guide also features comparative photographic plates for those groups of species that are easily misidentified. It provides, for the first time, species checklists for every national park in Tanzania.

July 2014. 320 pages. 329 colour photos. 16 line illus. 140 maps. 6 x 8.
Pa: 978-0-691-16117-4 £19.95 | \$29.95

Tracks and Signs of the Animals and Birds of Britain and Europe

Lars-Henrik Olsen

“I cannot praise *Tracks and Signs* highly enough. It is not only the finest guide to tracking I’ve ever held in my hands, it is one of the most attractive and informative books on natural history I’ve ever seen. This guide will prove invaluable to those who already take an interest in tracking and wish to gain more experience... I also wish to emphasize that this is not only a book for European (and British) naturalists. I definitely recommend it to naturalists in North America and East Asia as well. Yes, it is that good.”

—Jochen Roeder, *10,000 Birds*

2013. 274 pages. 600 colour illus. 25 maps. 6 x 9.

New App

Available Summer 2014

BirdGenie™

Backyard Birds West

BirdGenie™

Backyard Birds East

Software written by
Tom Stephenson & Stephen Travis Pope

BirdGenie™ is a remarkable new app that enables anyone with a supported Apple® or Android® smartphone or tablet to identify birds in the backyard, at the local park, or on the nature trail—all with the tap of a button! It’s like Shazam® for nature—just hold up your phone, make a clear recording of the bird singing, and BirdGenie tells you what bird it is! Sixty bird species are included in each regional app, covering almost all of the birds you are likely to encounter.

App Price: £1.99 | \$2.99

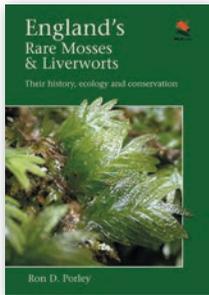

Compatibility:

Requires iOS 6.0 or later. Compatible with iPhone 3/4/5, iPad, iPad Mini, and iPod Touch

Requires Android 4.0 and above. Compatible with most common Android phones and tablets.

Shazam® is the registered trademark of Shazam Entertainment Limited and is not affiliated with Princeton University Press in any way.

BirdGenie™ is a trademark of Princeton University Press.

Wildlife of Australia
Iain Campbell & Sam Woods

"This informative and easy-to-read book presents Australia's habitat and wildlife, not just for the fanatical birder or naturalist, but for the general reader as well. I was impressed by the habitat images and the fact that the book touches upon what would most likely be seen during a trip to Australia."

—Tony Palliser, chairman of the Birdlife Australia Rarities Committee

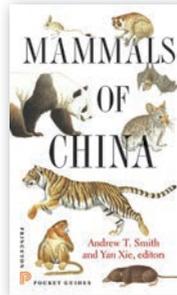

"We loved this pocket guide to the *Wildlife of Australia* and the authors and publishers are to be congratulated on producing such a high quality, genuine pocket book that is jam-packed with information."

—Alan Davies and Ruth Miller,

Mammals of China
**Edited by Andrew T. Smith &
Yan Xie**

China's breathtaking diversity of natural habitats—from mountains and deserts to grasslands and lush tropical forests—is home to more than 10 percent of the world's mammal species. This one-of-a-kind pocket guide describes the characteristics, geographic distribution, natural history, and conservation status of all 558 species of mammals found in China.

This field-ready pocket edition of *A Guide to the Mammals of China* makes the rich mammal fauna of China accessible to ecotravellers and naturalists like never before.

Beetles of Eastern North America
 Arthur V. Evans

Beetles of Eastern North America is a landmark book—the most comprehensive full-colour guide to the remarkably diverse and beautiful beetles of the United States and Canada east of the Mississippi River. It is the first colour-illustrated guide to cover 1,406 species in all 115 families that occur in the region—and the first new in-depth guide to the region in more than forty years. Lavishly illustrated with over 1,500 stunning colour images by some of the best insect photographers in North America, the book features an engaging and authoritative text by noted beetle expert Arthur Evans.

An unmatched guide to the rich variety of eastern North American beetles, this is an essential book for amateur naturalists, nature photographers, insect enthusiasts, students, and professional entomologists and other biologists.

2014. 560 pages. 1,500+ colour illus.
 31 line illus. 8 x 10.
 Pa: 978-0-691-13304-1 £24.95 | \$35.00

Primates of the World

An Illustrated Guide

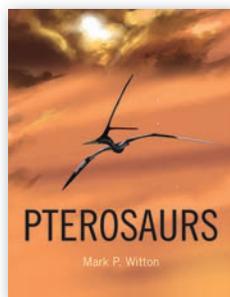

Jean-Jacques Petter & François Desbordes

Translated by Robert Martin

This stunningly illustrated guide to the world's primates covers nearly 300 species, from the feather-light and solitary pygmy mouse lemur of Madagascar—among the smallest primates known to exist—to the regal mountain gorillas of Africa. Organised by region and spanning every family of primates on Earth, the book features 72 splendid colour plates, facing-page descriptions of key features of each family, and 86 colour distribution maps.

Primates of the World also includes concise introductory chapters that discuss the latest findings on primate origins and evolution, behaviour and adaptations, and classification, making it the most comprehensive and up-to-date primate guide available.

2013. 192 pages. 72 colour plates. 13 colour illus. 7 line illus. 86 colour maps. 8 x 10.
Cl: 978-0-691-15695-8 £19.95 | \$29.95

"Witton's combination of style and substance makes *Pterosaurs* a true treasure and an absolute must for anyone curious about the extinct flyers."

—Brian Switek, National Geographic.com

New

Pterosaurs

Natural History, Evolution, Anatomy

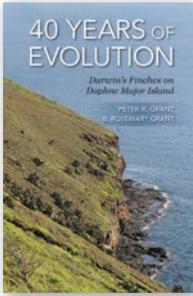

Mark P. Witton

"This really is the ultimate guide to pterosaurs, providing us with a richer view of pterosaur diversity and behaviour than allowed in the two previous great volumes on the group (Wellnhofer 1991, Unwin 2005) and containing a substantial amount of review and analysis of pterosaur ecology and functional morphology."

—Darren Naish, *Scientific American*

For 150 million years, the skies didn't belong to birds—they belonged to the pterosaurs. These flying reptiles, which include the pterodactyls, shared the world with the nonavian dinosaurs until their extinction 65 million years ago. Some pterosaurs, such as the giant azhdarchids, were the largest flying animals of all time, with wingspans exceeding thirty feet and standing heights comparable to modern giraffes. This richly illustrated book takes an unprecedented look at these astonishing creatures, presenting the latest findings on their anatomy, ecology, and extinction.

2013. 304 pages. 152 colour illus. 26 halftones. 14 line illus. 17 maps. 8 1/2 x 11.

The World's Rarest Birds
Erik Hirschfeld, Andy Swash, and Robert Still

"A dense, richly informative book...."

Offers a showcase of struggling birds globally—but each shot through a lens that celebrates their diversity, vibrance, elegance, and enthusiastic displays."

—Emma Bryce, Audubon.com

This beautifully illustrated book vividly depicts the most threatened birds on Earth. It provides up-to-date information from BirdLife International on the threats each species faces, and the measures being taken to save them. Today, 590 bird species are classified as Endangered or Critically Endangered, or now only exist in captivity. This landmark publication features stunning photographs of 515 species. This is the first time that images of many of these birds have been published.

2013. 360 pages. 977 colour photos. 103 colour illus. 610 colour maps. 8 1/2 x 11. Cl: 978-0-691-15596-8 £34.95 | \$45.00
