Preface ix

1. **Introduction** 1
  - 1.1. Linear PDE 2
  - 1.2. Solutions; Initial and Boundary Conditions 3
  - 1.3. Nonlinear PDE 4
  - 1.4. Beginning Examples with Explicit Wave-like Solutions 6  
Problems 8
  
2. **Beginnings** 11
  - 2.1. Four Fundamental Issues in PDE Theory 11
  - 2.2. Classification of Second-Order PDE 12
  - 2.3. Initial Value Problems and the Cauchy-Kovalevskaya Theorem 17
  - 2.4. PDE from Balance Laws 21  
Problems 26
  
3. **First-Order PDE** 29
  - 3.1. The Method of Characteristics for Initial Value Problems 29
  - 3.2. The Method of Characteristics for Cauchy Problems in Two Variables 32
  - 3.3. The Method of Characteristics in  $\mathbb{R}^n$  35
  - 3.4. Scalar Conservation Laws and the Formation of Shocks 38  
Problems 40
  
4. **The Wave Equation** 43
  - 4.1. The Wave Equation in Elasticity 43
  - 4.2. D'Alembert's Solution 48
  - 4.3. The Energy  $E(t)$  and Uniqueness of Solutions 56
  - 4.4. Duhamel's Principle for the Inhomogeneous Wave Equation 57
  - 4.5. The Wave Equation on  $\mathbb{R}^2$  and  $\mathbb{R}^3$  59  
Problems 61
  
5. **The Heat Equation** 65
  - 5.1. The Fundamental Solution 66
  - 5.2. The Cauchy Problem for the Heat Equation 68
  - 5.3. The Energy Method 73

- 5.4. The Maximum Principle 75
- 5.5. Duhamel's Principle for the Inhomogeneous Heat Equation 77  
Problems 78
  
- 6. Separation of Variables and Fourier Series 81**
  - 6.1. Fourier Series 81
  - 6.2. Separation of Variables for the Heat Equation 82
  - 6.3. Separation of Variables for the Wave Equation 91
  - 6.4. Separation of Variables for a Nonlinear Heat Equation 93
  - 6.5. The Beam Equation 94  
Problems 96
  
- 7. Eigenfunctions and Convergence of Fourier Series 99**
  - 7.1. Eigenfunctions for ODE 99
  - 7.2. Convergence and Completeness 102
  - 7.3. Pointwise Convergence of Fourier Series 105
  - 7.4. Uniform Convergence of Fourier Series 108
  - 7.5. Convergence in  $L^2$  110
  - 7.6. Fourier Transform 114  
Problems 117
  
- 8. Laplace's Equation and Poisson's Equation 119**
  - 8.1. The Fundamental Solution 119
  - 8.2. Solving Poisson's Equation in  $\mathbb{R}^n$  120
  - 8.3. Properties of Harmonic Functions 122
  - 8.4. Separation of Variables for Laplace's Equation 125  
Problems 130
  
- 9. Green's Functions and Distributions 133**
  - 9.1. Boundary Value Problems 133
  - 9.2. Test Functions and Distributions 136
  - 9.3. Green's Functions 144  
Problems 149
  
- 10. Function Spaces 153**
  - 10.1. Basic Inequalities and Definitions 153
  - 10.2. Multi-Index Notation 157
  - 10.3. Sobolev Spaces  $W^{k,p}(U)$  158  
Problems 159
  
- 11. Elliptic Theory with Sobolev Spaces 161**
  - 11.1. Poisson's Equation 161
  - 11.2. Linear Second-Order Elliptic Equations 167  
Problems 173

<b>12.</b>	<b>Traveling Wave Solutions of PDE</b>	175
12.1.	Burgers' Equation	175
12.2.	The Korteweg-deVries Equation	176
12.3.	Fisher's Equation	179
12.4.	The Bistable Equation	181
	Problems	186
<b>13.</b>	<b>Scalar Conservation Laws</b>	189
13.1.	The Inviscid Burgers Equation	189
13.2.	Scalar Conservation Laws	196
13.3.	The Lax Entropy Condition Revisited	201
13.4.	Undercompressive Shocks	204
13.5.	The (Viscous) Burgers Equation	206
13.6.	Multidimensional Conservation Laws	208
	Problems	211
<b>14.</b>	<b>Systems of First-Order Hyperbolic PDE</b>	215
14.1.	Linear Systems of First-Order PDE	215
14.2.	Systems of Hyperbolic Conservation Laws	219
14.3.	The Dam-Break Problem Using Shallow Water Equations	239
14.4.	Discussion	241
	Problems	242
<b>15.</b>	<b>The Equations of Fluid Mechanics</b>	245
15.1.	The Navier-Stokes and Stokes Equations	245
15.2.	The Euler Equations	247
	Problems	250
	<b>Appendix A.</b> Multivariable Calculus	253
	<b>Appendix B.</b> Analysis	259
	<b>Appendix C.</b> Systems of Ordinary Differential Equations	263
	References	265
	Index	269
