Preface ix

0. Introduction 1

0.1 Past Historiography 2

0.2 Aims of This Study 7

PREHISTORIC AND EARLY DYNASTIC PERIOD 11

1. The Invention of Writing and Number Notation 15

2. The Egyptian Number System 18

3. Uses of Numbers and Their Contexts in Predynastic and Early Dynastic Times 22

4. Summary 29

OLD KINGDOM 31

5. The Cultural Context of Egyptian Mathematics in the Old Kingdom 35

6. Metrological Systems 41

6.1 Length Units 41

6.2 Area Units 46

6.3 Capacity Units 48

6.4 Weights 49

7. Notation of Fractions 52

8. Summary 55

MIDDLE KINGDOM 57

9. Mathematical Texts (I): The Mathematical Training of Scribes 63

9.1 Extant Hieratic Mathematical Texts 63

9.1.1 Rhind Mathematical Papyrus 65

9.1.2 Lahun Mathematical Fragments 67

9.1.3 Papyrus Berlin 6619 68

9.1.4 Cairo Wooden Boards 68

9.1.5	Mathematical Leather Roll	68
9.1.6	Moscow Mathematical Papyrus	69
9.2	Teaching Mathematics: Mathematical Procedure Texts	70
9.2.1	The Formal Elements of a Procedure Text	76
9.2.2	Collections of Procedure Texts	79
9.3	Types of Mathematical Problems	81
10.	Foundation of Mathematics	84
10.1	Arithmetic Techniques	84
10.1.1	Multiplication of Integers	86
10.1.2	Division of Integers	88
10.2	Fraction Reckoning	89
10.2.1	Multiplications and Divisions Involving Fractions	90
10.2.2	Using Auxiliary Numbers	91
10.3	Tables for Fraction Reckoning	92
10.3.1	$2 \div n$ Table	93
10.3.2	Mathematical Leather Roll	96
10.4	Metrological Tables	99
10.5	Summary	101
11.	Mathematics in Practice and Beyond	102
11.1	Distribution of Rations	104
11.1.1	Ration Problems within the Mathematical Texts	105
11.1.2	Calculation of Rations in Papyrus Berlin 10005	108
11.1.3	Further Evidence	110
11.2	Architectural Calculations	112
11.2.1	Architectural Problems within the Mathematical Texts	112
11.2.2	Mathematics of Papyrus Reisner I	116
11.3	Land Measurement	117
11.3.1	Area Calculations within the Mathematical Texts	118
11.3.2	Evidence of Land Surveying	123
11.4	Summary	125
NEW KINGDOM 127		
12.	New Kingdom Mathematical Texts: Ostraca Senmut 153 and Turin 57170	131
13.	Two Examples of Administrative Texts	133
13.1	Papyrus Harris I	134
13.2	Papyrus Wilbour	139
14.	Mathematics in Literature	143
14.1	Mathematical Education	143

14.2 Mathematics in the Scribe's Daily Work	146
14.3 Mathematics in Papyrus Anastasi I	148
14.3.1 Digging a Lake (Papyrus Anastasi I, 13,6–13,7)	150
14.3.2 Constructing a Brick Ramp (Papyrus Anastasi I, 13,8–14,8)	151
14.3.3 Transport of an Obelisk (Papyrus Anastasi I, 14,8–16,5)	152
14.3.4 Erection of a Colossal Monument (Papyrus Anastasi I, 16,8–17,2)	154
14.3.5 Rations for an Expedition (Papyrus Anastasi I, 17,2–18,2)	155
15. Further Aspects of Mathematics from New Kingdom Sources	157
15.1 Mathematics and Wisdom Literature: Metrology in the <i>Teaching of Amenemope</i>	158
15.2 Mathematics in the <i>Duties of the Vizier</i>	161
15.3 Mathematics and Death	165
15.4 Mathematics in Architecture and Art	170
16. Summary	177

GRECO-ROMAN PERIODS 179

17. Mathematical Texts (II): Tradition, Transmission, Development	183
17.1 Overview of Extant Demotic Mathematical Papyri	183
17.1.1 Papyrus Cairo JE 89127-30, 89137-43	184
17.1.2 Papyrus BM 10399	184
17.1.3 Papyrus BM 10520	185
17.1.4 Papyrus BM 10794	185
17.1.5 Papyrus Carlsberg 30	185
17.1.6 Papyrus Griffith I E7	185
17.1.7 Papyrus Heidelberg 663	186
17.2 Demotic Arithmetic	186
17.2.1 Multiplication	186
17.2.2 Division (and a Note on Types of Fractions)	189
17.3 Selected Examples of Demotic Mathematical Problems	192
17.3.1 Calculation of Areas	192
17.3.2 The Pole-against-the-Wall Problems	197
18. Conclusion: Egyptian Mathematics in Historical Perspective	205
Bibliography	209
Subject Index	225
Egyptian Words and Phrases Index	231
Index of Mathematical Texts	233
