Preface	ix
Introduction	1
1 Topological Invariants and Differential Geometry	6
1.1 Topological Invariants	7
1.2 Fundamental Groups and Covering Spaces	10
1.3 Complex Manifolds and Metrics	13
1.4 Divisors, Line Bundles, the First Chern Class	16
2 Riemann Surfaces, Coverings, and Hypergeometric Functions	23
2.1 Genus and Euler Number	23
2.2 Möbius Transformations	25
2.3 Metric and Curvature	29
2.4 Behavior of the Euler Number under Finite Covering	33
2.5 Finite Subgroups of $\mathrm{PSL}(2, \mathbb{C})$	34
2.6 Gauss Hypergeometric Functions	36
2.7 Triangle Groups	41
2.8 The Hypergeometric Monodromy Group	45
3 Complex Surfaces and Coverings	47
3.1 Coverings Branched over Subvarieties with Transverse Intersections	47
3.2 Divisor Class Group and Canonical Class	49
3.3 Proportionality	54
3.4 Signature	59
3.5 Blowing Up Points	61
4 Algebraic Surfaces and the Miyaoka-Yau Inequality	65
4.1 Rough Classification of Algebraic Surfaces	65
4.2 The Miyaoka-Yau Inequality, I	70
4.3 The Miyaoka-Yau Inequality, II	73
5 Line Arrangements in $\mathbb{P}_2(\mathbb{C})$ and Their Finite Covers	85
5.1 Blowing Up Line Arrangements	87
5.2 Høfer's Formula	88

viii ■ Contents

5.3 Arrangements Annihilating R and Having Equal Ramification along All Lines	92
5.4 Blow-Up of a Singular Intersection Point	99
5.5 Possibilities for the Assigned Weights	103
5.6 Blowing Down Rational Curves and Removing Elliptic Curves	115
5.7 Tables of the Weights Giving $\text{Prop} = 0$	122
6 Existence of Ball Quotients Covering Line Arrangements	126
6.1 Existence of Finite Covers by Ball Quotients of Weighted Configurations: The General Case	128
6.2 Remarks on Orbifolds and b -Spaces	133
6.3 $K_{X''} + D''$ for Weighted Line Arrangements	135
6.4 Existence Question	139
6.5 Ampleness of $K_{X''} + D''$	140
6.6 Log-Terminal Singularities and LCS	145
6.7 Existence Theorem for Line Arrangements	148
6.8 Isotropy Subgroups of the Covering Group	164
7 Appell Hypergeometric Functions	167
7.1 The Action of S_5 on the Blown-Up Projective Plane	168
7.2 Appell Hypergeometric Functions	173
7.3 Arithmetic Monodromy Groups	181
7.4 Some Remarks about the Signature	186
A Torsion-Free Subgroups of Finite Index	189
A.1 Fuchsian Groups	190
A.2 Fenchel's Conjecture	191
A.3 Reduction to Triangle Groups	192
A.4 Triangle Groups	193
B Kummer Coverings	197
Bibliography	205
Index	213
