Policy Applications	xvii
Preface	xix
For Whom Is This Book Written?	xx
A Word on Tone and Technicality	xx
Acknowledgments	xxi
Introduction	1
Three Goals	4
The Role of Models	5
Why Rationality?	7
I	
NORMATIVE FOUNDATIONS	11
1	
Normative Frameworks	13
1.1 What Is a Normative Framework?	15
1.1.1 Private vs. Public Morality	16
1.2 Utilitarianism	17
1.2.1 Why Be a Utilitarian?	18
1.2.2 Some Problems for Utilitarianism	21
1.3 Egalitarianism	27
1.3.1 Equality of Outcomes	28
1.3.2 Equality of Opportunity	32
1.4 Kantian Deontology	37
1.4.1 Deontology and the Challenges to Utilitarianism	39
1.4.2 Challenges for Deontological Thinking	39
1.5 Libertarianism	41
1.5.1 Why Be a Libertarian?	43
1.5.2 Some Problems for Libertarianism	44
1.6 Takeaways	45
1.7 Further Reading	46
1.8 Exercises	47
2	
Collective Goals	51
2.1 Rational Individuals	52
2.2 Aggregation Procedures	53

2.3	Evaluative Criteria for Aggregation Procedures	55
2.3.1	Transitivity of Social Preferences	56
2.3.2	Unanimity	57
2.3.3	Independence of Irrelevant Alternatives	58
2.4	Arrow's Theorem	60
2.5	Social Decisions Instead of Social Preferences	61
2.6	The Public Interest?	63
2.6.1	Only Two Alternatives: May's Theorem	63
2.6.2	Ruling Out Some Collections of Preferences: The Median Voter Theorem	64
2.6.3	Intensity of Preferences	69
2.6.4	Agreement	70
2.7	Takeaways	70
2.8	Further Reading	71
2.9	Exercises	71
3	Pareto Concepts	74
3.1	Pareto Concepts	75
3.2	From Pareto Efficiency to Pareto Improvements	76
3.3	A Model of Policies and Preferences	77
3.3.1	Actions and Transfers	77
3.3.2	Quasi-Linearity: A Bridge from Pareto Efficiency to Pareto Improvement	78
3.4	A Bridge Too Far?	84
3.4.1	Limited Transfers and Distributional Concerns	84
3.4.2	Non Quasi-Linear Preferences	85
3.5	Relationship to Cost-Benefit Analysis	87
3.6	Are Pareto Improvements Unambiguously in the Public Interest?	89
3.7	Takeaways	90
3.8	Further Reading	91
3.9	Exercises	91
3.10	Appendix: Proof of Theorem 3.3.1	93
	Summing Up Normative Foundations	95
II	SOCIAL DILEMMAS	97
4	Externalities	99
4.1	Collective Action	101
4.1.1	The Social Dilemma	104
4.1.2	For general queries, contact webmaster@press.princeton.edu	104

4.2	Public Goods	105
4.2.1	Comparison to the First Best or Utilitarian Optimum	107
4.2.2	Interpretation	108
4.2.3	Concentrated vs. Diffuse Interests	109
4.3	The Tragedy of the Commons	114
4.3.1	A Pareto Improvement	118
4.3.2	The First Best	118
4.3.3	Interpretation	119
4.4	Policy Interventions	120
4.4.1	The Failure of Persuasion	120
4.4.2	Pigovian Subsidies and Taxes	122
4.4.3	Regulation	124
4.5	The Theory of the Second Best	124
4.5.1	The Second-Best Pigovian Subsidy	126
4.6	Alternative Responses	129
4.6.1	Altruism	130
4.6.2	A Market in Externalities	131
4.6.3	Ongoing Relationships and Self-Organization	135
4.7	Takeaways	144
4.8	Further Reading	144
4.9	Exercises	145
5	Coordination Problems	150
5.1	Coordination Failure	153
5.1.1	Interpretation	158
5.2	Coordination Traps	159
5.2.1	A Basic Model of Coordination Traps: Investment in Developing Countries	160
5.2.2	A Model of Bank Runs	162
5.2.3	A Model of Revolutions	163
5.2.4	Interpretation	165
5.3	Policy Responses	165
5.3.1	Communication	165
5.3.2	Short-Run Intervention	167
5.3.3	Insurance and the Second Best	167
5.4	Takeaways	168
5.5	Further Reading	169
5.6	Exercises	169
6	Commitment Problems	173
6.1	A Model of Conflict	174
6.1.1	Inefficient Conflict	178
6.1.2	Interpretation	178

6.2 The Hold-Up Problem	180
6.2.1 Interpretation	183
6.3 Policy Responses	183
6.4 Takeaways	185
6.5 Further Reading	185
6.6 Exercises	185
Summing Up Social Dilemmas	191

III CONSTRAINTS ON GOOD GOVERNANCE 193

7 Strategic Adjustment 197

7.1 Strategic Adversaries	199
7.1.1 Do Terrorists Really Strategically Adjust?	201
7.1.2 The War on Drugs	203
7.2 Incentivizing Multiple Tasks	205
7.2.1 High-Stakes Testing	211
7.3 Takeaways	213
7.4 Further Reading	214
7.5 Exercises	215

8 Dynamic Inconsistency 218

8.1 Time Inconsistency	219
8.1.1 The First Best	221
8.1.2 What Will the Government Do?	221
8.1.3 How Much Will a Consumer Consume?	222
8.1.4 Is the Government Time Consistent?	223
8.1.5 Time Inconsistency and Externalities	224
8.1.6 Rules vs. Discretion	224
8.1.7 Applications	225
8.2 Fiscal Manipulation	227
8.2.1 The First Best	229
8.2.2 Electoral Risk	230
8.2.3 Discounting the Future	231
8.3 When Policy Affects Future Power	232
8.3.1 The (Political) Second Best	239
8.4 Takeaways	241
8.5 Further Readings	241
8.6 Exercises	242

9	The Need for Information	244
9.1	Auctions	246
9.1.1	Second Price Auction	247
9.2	Providing a Public Good	248
9.2.1	Split-the-Costs	250
9.2.2	Veto and Split	251
9.2.3	General Mechanisms	251
9.2.4	The Second Best	257
9.3	Regulating a Monopolist	259
9.3.1	Monopolistic Equilibrium	261
9.3.2	Regulation with Full Information	263
9.3.3	Regulation with Uncertainty	264
9.3.4	An Informed Regulator	271
9.4	Takeaways	276
9.5	Further Reading	276
9.6	Exercises	277
10	Influence over Elected Officials	282
10.1	Particularistic Interests	283
10.2	Special Interests and Campaign Donations	286
10.3	Electoral Accountability	290
10.3.1	Rewards of Office	293
10.3.2	Term Limits	293
10.3.3	Incentives and Screening	294
10.3.4	Voter Information	295
10.3.5	The Risk of Electoral Pandering	300
10.4	Takeaways	301
10.5	Further Reading	302
10.6	Exercises	302
11	Institutions, Incentives, and Power	305
11.1	A Selectorate Model	307
11.1.1	Equilibrium	308
11.1.2	Outcomes and Institutions	312
11.2	Institutions and Development	314
11.2.1	Settler Mortality, Institutions, and the Economy	315
11.3	Foreign Aid	318
11.3.1	Poverty Traps and Foreign Aid	319
11.3.2	Does Foreign Aid Work through Poverty Traps?	319
11.3.3	Effective Aid?	321
11.3.4	A Political Economy of Foreign Aid	322

11.4 Takeaways	325
11.5 Further Reading	326
11.6 Exercises	326
Summing Up Constraints on Good Governance	328
Concluding Reflections on Politics and Policy	331

IV APPENDICES ON GAME THEORY 335

A Utility, Strategic-Form Games, and Nash Equilibrium 337

A.1 Utility	338
A.1.1 Expected Utility	338
A.2 Games in Strategic Form	342
A.2.1 Where to Eat?	342
A.2.2 Matching Pennies	343
A.2.3 Cleaning an Apartment	344
A.2.4 Choosing a Number	345
A.3 Nash Equilibrium	345
A.4 Why Nash Equilibrium?	347
A.4.1 No Regrets and Social Learning	347
A.4.2 Self-Enforcing Agreements	348
A.4.3 Analyst's Humility	349
A.5 Solving for Nash Equilibrium	349
A.6 Nash Equilibrium Examples	350
A.6.1 Where to Eat?	351
A.6.2 Matching Pennies	352
A.6.3 Cleaning an Apartment	352
A.6.4 Choosing a Number with Two Players	356
A.7 Takeaways	358
A.8 Exercises	358

B Extensive-Form Games 362

B.1 Games in Extensive Form	362
B.1.1 A Model of International Crisis	363
B.2 Game Trees	364
B.2.1 International Crisis Game	365
B.2.2 A Budget Game	365
B.2.3 The Centipede Game	366
B.3 Strategies as Complete Contingent Plans	366
B.3.1 International Crisis Game	366

B.3.2 Budget Game	366
B.3.3 The Centipede Game	367
B.4 Representing an Extensive-Form Game as a Strategic-Form Game	368
B.4.1 The International Crisis Game	368
B.4.2 The Budget Game	368
B.4.3 The Centipede Game	369
B.5 Nash Equilibria of Extensive-Form Games	369
B.5.1 International Crisis Game	370
B.5.2 The Budget Game	371
B.5.3 The Centipede Game	372
B.6 Subgame Perfect Nash Equilibrium	373
B.6.1 Subgame Perfection	374
B.6.2 Backward Induction	375
B.6.3 Indifference and Multiple Equilibria	378
B.6.4 Continuous Choices	379
B.7 Discounted Payoffs	380
B.8 Takeaways	381
B.9 Exercises	381
Bibliography	385
Index of Referenced Authors	393
General Index	396
