Notation	ix
Preface	xi
Chapter 1. SYMMETRIC MARKOVIAN SEMIGROUPS AND DIRICHLET FORMS	1
1.1 Dirichlet Forms and Extended Dirichlet Spaces	1
1.2 Excessive Functions and Capacities	15
1.3 Quasi-Regular Dirichlet Forms	24
1.4 Quasi-Homeomorphism of Dirichlet Spaces	30
1.5 Symmetric Right Processes and Quasi-Regular Dirichlet Forms	33
Chapter 2. BASIC PROPERTIES AND EXAMPLES OF DIRICHLET FORMS	37
2.1 Transience, Recurrence, and Irreducibility	37
2.2 Basic Examples	50
2.3 Analytic Potential Theory for Regular Dirichlet Forms	77
2.4 Local Properties	88
Chapter 3. SYMMETRIC HUNT PROCESSES AND REGULAR DIRICHLET FORMS	92
3.1 Relations between Probabilistic and Analytic Concepts	92
3.2 Hitting Distributions and Projections I	103
3.3 Quasi Properties, Fine Properties, and Part Processes	106
3.4 Hitting Distributions and Projections II	113
3.5 Transience, Recurrence, and Path Behavior	118
Chapter 4. ADDITIVE FUNCTIONALS OF SYMMETRIC MARKOV PROCESSES	130
4.1 Positive Continuous Additive Functionals and Smooth Measures	130
4.2 Decompositions of Additive Functionals of Finite Energy	143
4.3 Probabilistic Derivation of Beurling-Deny Formula	151

Chapter 5. TIME CHANGES OF SYMMETRIC MARKOV PROCESSES	166
5.1 Subprocesses and Perturbed Dirichlet Forms	168
5.2 Time Changes and Trace Dirichlet Forms	174
5.3 Examples	190
5.4 Energy Functionals for Transient Processes	202
5.5 Trace Dirichlet Forms and Feller Measures	206
5.6 Characterization of Time-Changed Processes	221
5.7 Excursions, Exit System, and Feller Measures	225
5.8 More Examples	232
Chapter 6. REFLECTED DIRICHLET SPACES	240
6.1 Terminal Random Variables and Harmonic Functions	241
6.2 Reflected Dirichlet Spaces: Transient Case	246
6.3 Recurrent Case	260
6.4 Toward Quasi-Regular Cases	262
6.5 Examples	269
6.6 Silverstein Extensions	275
6.7 Equivalent Notions of Harmonicity	283
Chapter 7. BOUNDARY THEORY FOR SYMMETRIC MARKOV PROCESSES	300
7.1 Reflected Dirichlet Space for Part Processes	302
7.2 Douglas Integrals and Reflecting Extensions	310
7.3 Lateral Condition for L^2 -Generator	324
7.4 Countable Boundary	334
7.5 One-Point Extensions	340
7.6 Examples of One-Point Extensions	352
7.7 Many-Point Extensions	369
7.8 Examples of Many-Point Extensions	377
Appendix A. ESSENTIALS OF MARKOV PROCESSES	391
A.1 Markov Processes	391
A.2 Basic Properties of Borel Right Processes	413
A.3 Additive Functionals of Right Processes	423
A.4 Review of Symmetric Forms	440
Appendix B. SOLUTIONS TO EXERCISES	443
Notes	451
Bibliography	457
Catalogue of Some Useful Theorems	467
Index	473
