# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Key notions and notation . . . . .	9
<b>2</b>	<b>Gâteaux differentiability of Lipschitz functions</b>	<b>12</b>
2.1	Radon-Nikodým property . . . . .	12
2.2	Haar and Aronszajn-Gauss null sets . . . . .	13
2.3	Existence results for Gâteaux derivatives . . . . .	15
2.4	Mean value estimates . . . . .	16
<b>3</b>	<b>Smoothness, convexity, porosity, and separable determination</b>	<b>23</b>
3.1	A criterion of differentiability of convex functions . . . . .	23
3.2	Fréchet smooth and nonsmooth renormings . . . . .	24
3.3	Fréchet differentiability of convex functions . . . . .	28
3.4	Porosity and nondifferentiability . . . . .	31
3.5	Sets of Fréchet differentiability points . . . . .	33
3.6	Separable determination . . . . .	37
<b>4</b>	<b><math>\varepsilon</math>-Fréchet differentiability</b>	<b>46</b>
4.1	$\varepsilon$ -differentiability and uniform smoothness . . . . .	46
4.2	Asymptotic uniform smoothness . . . . .	51
4.3	$\varepsilon$ -Fréchet differentiability of functions on asymptotically smooth spaces . . . . .	59
<b>5</b>	<b><math>\Gamma</math>-null and <math>\Gamma_n</math>-null sets</b>	<b>72</b>
5.1	Introduction . . . . .	72
5.2	$\Gamma$ -null sets and Gâteaux differentiability . . . . .	74
5.3	Spaces of surfaces, and $\Gamma$ - and $\Gamma_n$ -null sets . . . . .	76
5.4	$\Gamma$ - and $\Gamma_n$ -null sets of low Borel classes . . . . .	81
5.5	Equivalent definitions of $\Gamma_n$ -null sets . . . . .	87
5.6	Separable determination . . . . .	93
<b>6</b>	<b>Fréchet differentiability except for <math>\Gamma</math>-null sets</b>	<b>96</b>
6.1	Introduction . . . . .	96
6.2	Regular points . . . . .	97
6.3	A criterion of Fréchet differentiability . . . . .	100
6.4	Fréchet differentiability except for $\Gamma$ -null sets . . . . .	114

<b>7</b>	<b>Variational principles</b>	<b>120</b>
7.1	Introduction . . . . .	120
7.2	Variational principles via games . . . . .	122
7.3	Bimetric variational principles . . . . .	127
<b>8</b>	<b>Smoothness and asymptotic smoothness</b>	<b>133</b>
8.1	Modulus of smoothness . . . . .	133
8.2	Smooth bumps with controlled modulus . . . . .	141
<b>9</b>	<b>Preliminaries to main results</b>	<b>156</b>
9.1	Notation, linear operators, tensor products . . . . .	156
9.2	Derivatives and regularity . . . . .	157
9.3	Deformation of surfaces controlled by $\omega_n$ . . . . .	161
9.4	Divergence theorem . . . . .	164
9.5	Some integral estimates . . . . .	165
<b>10</b>	<b>Porosity, <math>\Gamma_n</math>- and <math>\Gamma</math>-null sets</b>	<b>169</b>
10.1	Porous and $\sigma$ -porous sets . . . . .	169
10.2	A criterion of $\Gamma_n$ -nullness of porous sets . . . . .	173
10.3	Directional porosity and $\Gamma_n$ -nullness . . . . .	186
10.4	$\sigma$ -porosity and $\Gamma_n$ -nullness . . . . .	189
10.5	$\Gamma_1$ -nullness of porous sets and Asplundness . . . . .	192
10.6	Spaces in which $\sigma$ -porous sets are $\Gamma$ -null . . . . .	198
<b>11</b>	<b>Porosity and <math>\varepsilon</math>-Fréchet differentiability</b>	<b>202</b>
11.1	Introduction . . . . .	202
11.2	Finite dimensional approximation . . . . .	203
11.3	Slices and $\varepsilon$ -differentiability . . . . .	208
<b>12</b>	<b>Fréchet differentiability of real-valued functions</b>	<b>222</b>
12.1	Introduction and main results . . . . .	222
12.2	An illustrative special case . . . . .	225
12.3	A mean value estimate . . . . .	230
12.4	Proof of Theorems 12.1.1 and 12.1.3 . . . . .	234
12.5	Generalizations and extensions . . . . .	261
<b>13</b>	<b>Fréchet differentiability of vector-valued functions</b>	<b>262</b>
13.1	Main results . . . . .	262
13.2	Regularity parameter . . . . .	263
13.3	Reduction to a special case . . . . .	269
13.4	Regular Fréchet differentiability . . . . .	289
13.5	Fréchet differentiability . . . . .	304
13.6	Simpler special cases . . . . .	317

<b>14 Unavoidable porous sets and nondifferentiable maps</b>	<b>319</b>
14.1 Introduction and main results . . . . .	319
14.2 An unavoidable porous set in $\ell_1$ . . . . .	325
14.3 Preliminaries to proofs of main results . . . . .	332
14.4 The main construction, Part I . . . . .	339
14.5 The main construction, Part II . . . . .	344
14.6 Proof of Theorem 14.1.3 . . . . .	347
14.7 Proof of Theorem 14.1.1 . . . . .	351
<b>15 Asymptotic Fréchet differentiability</b>	<b>355</b>
15.1 Introduction . . . . .	355
15.2 Auxiliary and finite dimensional lemmas . . . . .	359
15.3 The algorithm . . . . .	363
15.4 Regularity of $f$ at $x_\infty$ . . . . .	372
15.5 Linear approximation of $f$ at $x_\infty$ . . . . .	380
15.6 Proof of Theorem 15.1.3 . . . . .	389
<b>16 Differentiability of Lipschitz maps on Hilbert spaces</b>	<b>392</b>
16.1 Introduction . . . . .	392
16.2 Preliminaries . . . . .	394
16.3 The algorithm . . . . .	396
16.4 Proof of Theorem 16.1.1 . . . . .	403
16.5 Proof of Lemma 16.2.1 . . . . .	403
<b>Bibliography</b>	<b>415</b>
<b>Index</b>	<b>419</b>
<b>Index of Notation</b>	<b>423</b>
