A captivating A–Z treasury about birds and birding

Birdpedia

Birdpedia is an engaging illustrated compendium of bird facts and birding lore. Featuring nearly 200 entries—on topics ranging from plumage and migration to birds in art, literature, and folklore—this enticing collection is brimming with wisdom and wit about all things avian. Christopher Leahy sheds light on “hawk-watching” and “twitching,” shares illuminating insights about pioneering ornithologists, and describes unique bird behaviors such as anting, caching, duetting, and mobbing. With charming illustrations by Abby McBride, *Birdpedia* is a marvelous mix of fact and fancy that is certain to delight.

Christopher W. Leahy holds the Gerard A. Bertrand Chair of Natural History and Field Ornithology (Emeritus) at the Massachusetts Audubon Society. **Abby McBride** is a nature artist and science writer. She runs the blog *Sketch Biologist*.

June 2021. 272 pages. 50 b/w illus. 4 ½ x 7.

A delightful illustrated treasury of botanical facts and fancy

Florapedia

Florapedia is an eclectic A–Z compendium of botanical lore. With more than 100 enticing entries—on topics ranging from achlorophyllous plants that use a fungus as an intermediary to obtain nutrients from other plants to zygomorphic flowers that admit only the most select pollinators—this collection is a captivating journey into the realm of botany.

Writing in her incomparably engaging style, Carol Gracie discusses remarkable plants from around the globe, botanical art and artists, early botanical explorers, ethnobotanical uses of plants, botanical classification and terminology, the role of plants in history, and more. With charming drawings by Amy Jean Porter, *Florapedia* a pleasure for anyone interested in botanical art, history, medicine, or exploration.

Carol Gracie is a naturalist, photographer, and lecturer. **Amy Jean Porter** is an artist, illustrator, and naturalist.

An informative, richly illustrated book about eighty of the world's most important and remarkable trees

Trees of Life

Our planet is home to some three trillion trees—roughly four hundred for every person on Earth. In *Trees of Life*, Max Adams selects, from sixty thousand extant species, eighty remarkable trees through which to celebrate the richness of humanity's relationship with trees, woods, and forests. From the apple to the oak, the logwood to the breadfruit, and the paper mulberry to the Dahurian larch, these are trees that offer not merely shelter, timber, and fuel but also drugs, foods, and fibers. *Trees of Life* presents a plethora of fascinating stories about them.

Max Adams is the author of several books, including *The Wisdom of Trees*, *The Little Book of Planting Trees*, and *In the Land of Giants*.

A fully revised and updated new edition of the award-winning, bestselling field guide to East African birds

Birds of East Africa

Birds of East Africa is widely regarded as one of the best field guides to any region of the world. Named a BirdTwitch Best Bird Book of the year for Africa when it was first published, it has become the go-to guide. Featuring revised text and distribution maps and the latest taxonomy, this comprehensive but compact guide describes and illustrates 1,448 species—all the resident, migrant, and vagrant birds of Kenya, Tanzania, Uganda, Rwanda, and Burundi. Featuring 289 color plates with more than 3,500 painstakingly rendered images, the guide depicts all the plumages and major races likely to be encountered. More than ever, this is the must-have guide for birding in East Africa.

Terry Stevenson is one of Africa's foremost bird tour guides and is a member of the East African Rarities Committee.

John Fanshawe is an author and environmentalist.

A comprehensive and authoritative illustrated guide to all of Chile's birds

Field Guide to the Birds of Chile

With its diverse range of habitats, Chile boasts a remarkable variety of breeding and visiting birds, from penguins to hummingbirds, making the country one of South America's top birding destinations. This comprehensive and authoritative field guide covers every one of Chile's 468 recorded species, including vagrants. All are illustrated in superb detail in 89 color plates, which feature every major plumage variation. Concise, facing-page species accounts describe key identification features, status, range, habitat, and voice, and accurate distribution maps are provided for every species. The result is an essential field guide to the birds of this beautiful country.

Gonzalo E. González Cifuentes is a writer and wildlife photographer and the author of many books on birds and wildlife in Chile. **Daniel E. Martínez Piña** has devoted his life to ornithology and illustration.

A large-format, beautifully illustrated look at the natural history of birds

What Is a Bird?

There are some 10,000 bird species in existence today, occupying every continent and virtually every habitat on Earth. The variety of bird species is truly astounding, from the tiny bee hummingbird to the large flightless ostrich. Taking you inside the extraordinary world of birds, *What Is a Bird?* explores all aspects of these remarkable creatures, providing an up-close look at their morphology, unique internal anatomy and physiology, fascinating and varied behavior, and ecology. It features hundreds of color illustrations and draws on a broad range of examples, from the familiar backyard sparrow to the most exotic birds of paradise. A must-have book for birders and armchair naturalists, *What Is a Bird?* is a celebration of the rich complexity of bird life.

A remarkable exploration of naturalized parrots, among the most widely distributed birds in the world

Naturalized Parrots of the World

There are more than 350 species of parrots in the world, and approximately 300 of these species have been transported to other countries through the caged pet trade. Whether through escaped captivity or purposeful release, many of these parrots are now breeding in new habitats. Indeed, no less than 75 species of parrots have established breeding populations in countries where they were introduced, and parrots are now among the most widely distributed group of birds. *Naturalized Parrots of the World* is the first book to examine this specific avian population.

Stephen Pruett-Jones is associate professor of ecology and evolution at the University of Chicago. He has spent forty-five years studying the biology and behavior of birds in North America, Australia, and Papua New Guinea.

A comprehensive and beautifully illustrated overview to the birds of Maine

Birds of Maine

The first comprehensive overview of Maine's incredibly rich birdlife in more than seven decades, *Birds of Maine* is a detailed account of all 464 species recorded in the Pine Tree State. It is also a thoroughly researched, accessible portrait of a region undergoing rapid changes, with southern birds pushing north, northern birds expanding south, and once-absent natives like Atlantic Puffins brought back by innovative conservation techniques pioneered in Maine. Gorgeously illustrated with watercolors by Lars Jonsson and scores of line drawings by Barry Van Dusen, *Birds of Maine* is a remarkable guide.

Peter D. Vickery, PhD (1949–2017), was one of New England's leading ornithologists. The coauthors for *Birds of Maine* include **Charles D. Duncan**, **William J. Sheehan**, and **Jeffrey V. Wells**, with coeditors **Barbara Vickery** and **Scott Weidensaul**.

The ultimate visual journey into the beautiful and complex world of wasps

Wasps

Wasps are far more diverse than the familiar yellowjackets and hornets that harass picnickers and build nests under the eaves of our homes. These amazing, mostly solitary creatures thrive in nearly every habitat on Earth, and their influence on our lives is overwhelmingly beneficial. Wasps are agents of pest control in agriculture and gardens. They are subjects of study in medicine, engineering, and other important fields. Wasps pollinate flowers, engage in symbiotic relationships with other organisms, and create architectural masterpieces in the form of their nests. This richly illustrated book introduces you to some of the most spectacular members of the wasp realm, colorful in both appearance and lifestyle.

An enticing illustrated look at pollination, one of the most astonishing marvels of the natural world

Pollination

Pollination is essential to the survival of most plants on Earth. Some plants rely on the wind to transport pollen from one flower to another. Others employ an array of ingenious strategies to attract and exploit pollinators, whether they be insects, birds, or mammals. This beautifully illustrated book provides an unprecedented look at the wonders of pollination biology, drawing on the latest science to explain the extraordinarily complex relationship between plant and pollinator, and revealing why pollination is vital for healthy ecosystems and a healthy planet.

Timothy Walker is lecturer in plant sciences at Somerville College, University of Oxford. He is the author of *Plant Conservation: Why It Matters and How It Works*, *Plants: A Very Short Introduction*, and *Euphorbias*.

The first field guide that allows amateur rock enthusiasts to identify basic rocks and rock formations

Rocks and Rock Formations

Many of us are fascinated by rocks—but identifying them can seem daunting. It's often tricky even for geologists, who rely on experience, intuition, and in-depth familiarity with rock-forming components. *Rocks and Rock Formations* allows everyone, amateur or professional, to successfully distinguish these amazing masses of minerals, using only careful observation, a magnifying glass, a pocket knife—and a bit of patience. Assuming little prior experience or knowledge, this book is an invaluable resource for rock enthusiasts everywhere.

Jürg Meyer is a professional geologist and licensed mountain guide, as well as lecturer and author in the areas of geology and the environment.

Backyard Birds Flash Cards Western North America *and* Eastern & Central North America

Backyard Birds Flash Cards, designed by the Cornell Lab of Ornithology, makes bird watching even more fun! These lavish boxed sets focus on the birds in North America, helping you to maximize your chances of identifying species particular to your region, neighborhood, and backyard. The cards come with detailed information for 110 species, including useful range maps, photos of female birds when plumage differs, and QR codes (compatible with the free downloadable Bird QR app) that link to birdsong vocalizations. All identification information is organized by the following keys: size and shape, color pattern, behavior, and habitat. Based on vetted ornithological content from a trusted and leading authority, *Backyard Birds Flash Cards* is an exciting, handy tool for bird watchers of all ages.

- Identification information for 110 bird species in western North America
- Identification information for 110 bird species in eastern and central North America
- QR codes that access birdsong samples
- Range maps
- Gorgeous photos of male and female species (if plumage is different)

The Cornell Lab of Ornithology's mission is to interpret and conserve the earth's biological diversity through research, education, and citizen science focused on birds. Dedicated to advancing the understanding and protection of the natural world, the Cornell Lab joins with people from all walks of life to make new scientific discoveries, share insights, and galvanize conservation action. birds.cornell.edu

A comprehensive illustrated field guide to the birds of Malaysia and Singapore

Birds of Malaysia and Singapore

This comprehensive field guide looks at all 829 officially recorded bird species of Malaysia and Singapore. More than 165 detailed color plates show plumage variation and identifying features, and for each species, key facts examine size, voice, range and status, habitat, specific country, and breeding. This book also includes information on taxonomy and nomenclature, an overview of geography and major habitats, key birdwatching sites with maps, and easy-to-use graphic indexes. This guide is essential for any naturalist interested in this region of the world.

Lim Kim Seng, Yong Ding Li, Lim Kim Chuah & Dana Gardner

An updated edition of the acclaimed field guide to the spectacular birds of the West Indies

Birds of the West Indies

Birds of the West Indies is the first field guide that covers and depicts all birds known to occur in the region, including infrequently occurring and introduced forms. Now fully updated and expanded, this stunningly illustrated book features detailed accounts of more than 600 species, describing identification field marks, range, status, voice, and habitat. There are more than 100 beautiful color plates that depict plumages of all species—including those believed to have recently become extinct—as well as distribution maps, a color code for endemic birds, and an incisive introduction that discusses avifaunal changes in the West Indies in the past fifteen years and the importance of conservation.

Herbert A. Raffaele is former chief of the Division of International Conservation at the US Fish and Wildlife Service.

2020. 288 pages. 126 color plates. 5 x 8 1/2.

Great Adaptations

From star-nosed moles that have super-sensing snouts to electric eels that paralyze their prey, animals possess unique and extraordinary abilities. In *Great Adaptations*, Kenneth Catania presents an entertaining and engaging look at some of nature's most remarkable creatures. Telling the story of his biological detective work, Catania sheds light on the mysteries behind the behaviors of tentacled snakes, tiny shrews, zombie-making wasps, and more.

Kenneth Catania is the Stevenson Professor of Biological Sciences at Vanderbilt University.

Ant Architecture

Walter Tschinkel has spent much of his career investigating the hidden subterranean realm of ant nests. This wonderfully illustrated book takes you inside an unseen world where thousands of ants build intricate homes in the soil beneath our feet. Offering a unique look at how simple methods can lead to pioneering science, *Ant Architecture* addresses the unsolved mysteries of underground ant nests while charting new directions for tomorrow's research, and reflects on the role of beauty in nature and the joys of shoestring science.

Walter R. Tschinkel is professor emeritus of biological science at Florida State University and a world authority on ant biology.

The Last Butterflies

Most of us have heard of such popular butterflies as the Monarch or Painted Lady. But what about the Fender’s Blue? Or the St. Francis’ Satyr? Because of their extreme rarity, these butterflies are not well-known, yet they are remarkable species with important lessons to teach us. *The Last Butterflies* spotlights the rarest of these creatures. Drawing from his own first-hand experiences, Nick Haddad explores the challenges of tracking these vanishing butterflies, why they are disappearing, and why they are worth saving.

Nick Haddad is a professor in the Department of Integrative Biology and the W. K. Kellogg Biological Station at Michigan State University.

Social Butterflies

Throughout his career, Henry Horn took a unique approach to the study of butterflies. This book brings together his findings with recent advances in behavioral ecology to provide an incomparable look at the social lives of butterflies, illuminating for the first time the marvelously diverse range of butterfly behaviors across several species.

Henry S. Horn (1941–2019) was professor emeritus of ecology and evolutionary biology at Princeton University.

Plants That Cure

Of the nearly 400,000 plants that have evolved on Earth, around seven percent of them have been used in traditional herbal medicine or as local remedies. More recently, scientific studies have revealed how plants may be sources of important medicines, often in the form of single isolated compounds. *Plants That Cure* explores these critical compounds and the plants that produce them.

Far from Land

Seabirds evoke the spirit of the earth's wildest places. They spend large portions of their lives at sea, often far from land, and nest on remote islands that humans rarely visit. Thanks to increasingly sophisticated and miniaturized devices that can track their every movement and behavior, it is now possible to observe the mysterious lives of these remarkable creatures as never before. This book takes you on a breathtaking journey around the globe to provide an extraordinary up-close look at the activities of seabirds.

A uniquely personal meditation on Britain's gulls by one of today's leading wildlife writers

The Gull Next Door

From a distance, gulls are beautiful symbols of freedom over the oceanic wilderness. Up close, however, they can be loud, aggressive and even violent. Yet gulls fascinate birdwatchers, and seafarers regard them with respect and affection. *The Gull Next Door* explores the natural history of gulls and their complicated relationship with humans.

Marianne Taylor is a freelance writer, editor, illustrator and photographer. Her books include *RSPB British Birds of Prey*, *The Way of the Hare* and *Wild Coast: A Celebration of the Places Where Land Meets Sea*. **David Lindo** is a naturalist, writer, broadcaster, speaker, photographer, wildlife tour leader and educator. His books include *How to Be an Urban Birder* (Princeton).

2020. 192 pages. 17 b/w illus. 6 x 9.

The Marine World

The Marine World is a book for everyone with an interest in the ocean, from the marine biologist or student wanting expert knowledge of a particular group to the naturalist or diver exploring the seashore and beyond. With colour illustrations, line drawings, more than 1,500 colour photographs, and with clear accessible text, this book encompasses all those organisms that live in, on and around the ocean, bringing together in a single text everything from the minuscule to the immense.

The Marine World is the product of a lifetime spent by Frances Dipper happily observing and studying marine organisms the world over. It has been brought to colourful life by a myriad of enthusiastic underwater photographers and by Marc Dando, the renowned natural history illustrator.

Frances Dipper is an author, lecturer and marine consultant
