

European Edition

Princeton Nature

2021

“You really haven’t seen anything until you take a look at this!”

—John Miles and Matt Merritt, *Birdwatching Magazine*

Flight Identification of European Passerines and Select Landbirds

“The artwork is sublime and shows each species in great detail from above, below and in profile.... It is a book I wouldn’t want to be without.”

—Paul Stancliffe, British Trust for Ornithology

- The first field guide to flight identification of European passerines and related landbirds
- Covers 205 European passerines and 32 near-passerines
- Features 850 stunning colour illustrations
- Includes more than 2,400 photos showing typical profiles of each species in flight
- Provides detailed information on flight calls, with links to online recordings

Tomasz Cofta is one of the most experienced field ornithologists in Europe.

WILDGuides

2021. 496 pages. 850 colour + 219 b/w illus. 2,488 colour photos. 156 x 235 mm
Paperback 9780691177571 £35.00

The most comprehensive single-volume photographic guide to Europe's birds ever produced

Europe's Birds

- Covers all species ever recorded in Europe, including established introductions
- Describes all distinctive plumages and subspecies
- Provides details of vocalizations, flight action and favoured habitats
- Features more than 4,500 photographs, including comparison pages of birds in flight
- Includes 540 maps, prepared in association with BirdLife International

Easy-to-use and practical, birdwatchers of any ability will benefit from the clear text, details on range, status and habitat, and an unrivalled selection of photographs.

Rob Hume is a freelance writer, editor and artist. **Robert Still** is an ecologist and graphic artist. **Andy Swash** is an ecologist and well-known wildlife photographer and author. **Hugh Harrop** is an award-winning photographer.

Acclaimed by birdwatchers of all kinds, from the beginner to the most experienced—now thoroughly revised and updated

Britain's Birds: Second Edition

“[A] superlative second edition.... All those who were delighted when *Britain's Birds* was first rolled out would be well advised in investing in this encyclopaedic but easy to use and handle work.”—Stuart Winter, *Sunday Express*

“This is still by far the best photographic guide to Britain's birds.”—Andy Stoddart, *Rare Bird Alert*

“All in all, this is an absolutely superb guide that deserves to furnish every British birder's bookshelf.”—Josh Jones, Birdguides.com

Acclaimed by birdwatchers of all kinds, from the beginner to the most experienced, the guide has now been thoroughly revised and updated to make it even better than before.

Rob Hume is a freelance writer, editor and artist. **Robert Still** is an ecologist and graphic artist. **Andy Swash** is an ecologist and well-known wildlife photographer and author. **Hugh Harrop** is an award-winning photographer. **David Tipling** is one of the world's most widely published wildlife photographers.

A carefully designed and lavishly illustrated photographic guide that fits in the pocket

British Birds: A Pocket Guide

“This is a fantastic piece of work . . . a must have for new and seasoned birders alike.”—Scott Mayson, British Trust for Ornithology

“I must say I was blown away! Not only are the photographs of the highest quality but the designers have crammed an incredible amount of information into what is literally a coat pocket sized book. . . This is an excellent and outstanding book and at no more than a tenner that is great value for money.”—*Essex Birding*

This is the perfect book for anyone wanting to put a name to the birds in their garden, local area or on visits farther afield. Packed with hundreds of stunning photos showing the birds in their many variations, it has been written and designed by a team of experienced birdwatchers.

Rob Hume is a freelance writer, editor and artist. **Robert Still** is an ecologist and graphic artist. **Andy Swash** is an ecologist and well-known wildlife photographer and author. **Hugh Harrop** is an award-winning photographer. **David Tipling** is one of the world’s most widely published wildlife photographers.

A remarkable exploration of naturalized parrots, among the most widely distributed birds in the world

Naturalized Parrots of the World

There are more than 350 species of parrots in the world, and approximately 300 of these species have been transported to other countries through the caged pet trade. Whether through escaped captivity or purposeful release, many of these parrots are now breeding in new habitats.

Bringing together the work of leading researchers in one convenient volume, this book explores the biology of naturalized parrots and their interactions with native ecosystems.

Stephen Pruett-Jones is associate professor of ecology and evolution at the University of Chicago.

August 2021. 304 pages. 50 colour photos, graphs and maps. 178 x 254mm
 Hardback 9780691204413 £35.00

A marvelous journey into the world of bird evolution

How Birds Evolve

How Birds Evolve explores how evolution has shaped the distinctive characteristics and behaviours we observe in birds today. Douglas Futuyma describes how evolutionary science illuminates the wonders of birds, ranging over topics such as the meaning and origin of species, the evolutionary history of bird diversity, and the evolution of avian reproductive behaviours, plumage ornaments, and social behaviours. A must-read for bird enthusiasts and curious naturalists, *How Birds Evolve* shows how evolutionary biology helps us better understand birds and their natural history.

Douglas Futuyma is Distinguished Professor Emeritus in the Department of Ecology and Evolution at Stony Brook University, State University of New York.

October 2021. 248 pages. 32 colour + 67 b/w illus. 4 tables. 156 x 235 mm
Hardback 9780691182629 £25.00

A large-format, beautifully illustrated look at the natural history of birds

What Is a Bird?

“This is a top book.”—Chris Packham, Self-Isolating Bird Club

“This welcoming compendium is part coffee-table book and part deep dive into the science of ornithology—the team of biologist-authors, edited by biology professor Williams, elucidates all things bird.”—Andrea Gawrylewski, *Scientific American*

Tony D. Williams is professor of biological sciences at Simon Fraser University and a fellow of the American Ornithological Society.

Contributions by **Scott McWilliams, Julia A. Clarke, Elizabeth MacDougall-Shackleton, Scott MacDougall-Shackleton, Frances Bonier & Chad Eliason**

An illustrated look at corals from around the world

Coral Reefs

This stunningly illustrated book profiles the astonishing diversity of the world’s coral groups, describing key aspects of their natural history and explaining why coral reefs are critical to the health of our oceans.

- Includes more than 200 exquisite colour photos
- Highlights key aspects of corals and their natural history
- Features representative examples from around the world
- Includes rare and unusual species

Charles Sheppard is professor emeritus of life sciences at the University of Warwick.

August 2021. 240 pages. 200+ colour photos. 203 x 254 mm
 Hardback 9780691198682 £28.00

REEF FISH DIVERSITY AND ABUNDANCE OF REEF FISH

A kaleidoscope of thousands of colorful fish is probably the first thing that strikes any observer on a coral reef. Schools of jacks, hollers, and even humpbacks swim over it; schools of parrotfish and snappers, sometimes hundreds strong, graze, browse, and hunt over the surface of the coral; butterflyfish and angelfish dart in pairs; and clownfish, wrack of small, colorful fish hover close to the surface and disappear into crevices or branching corals if they feel threatened. This riot of color and movement is overwhelming.

There are an estimated 6,000 to 8,000 coral reef fish species, about a sixth being in the Caribbean, with the

remainder in the Indo-Pacific. Globally, diversity patterns are similar to those of corals, being highest in the Southeast Asian region. On any one reef or set of reefs, however, less diversity will be found: the Great Barrier Reef has a total of about 1,500 species and some remote atoll systems have far fewer. Some species occur over large ranges, from Africa through the Asian archipelago and most of the way across the Pacific, while others are much more restricted, perhaps to a few adjacent atolls. Like with corals, the diversity of reef fish declines in higher latitudes.

On a single reef, fish species are distributed according to the strength of the light, depth, and the strength of the wave-

108 | FROM A CORAL REEF FISH

A richly illustrated exploration of the world's seaweeds and algae

The Lives of Seaweeds

The Lives of Seaweeds presents an inside look at the remarkable world of seaweeds and other algae. Coming in all colours, shapes, and sizes, seaweeds and algae are omnipresent, forming the basis of most marine food webs. They also provide seventy percent of the planet's oxygen. Touted as the biofuel of the future, they are a cheap and nutritious food source, exhibit antiviral and antitumor properties, and play a central role in biogeochemical cycles that maintain the health of our planet. This is essential reading for naturalists and marine life enthusiasts.

Julie A. Phillips is an environmental consultant, marine biologist, and algal specialist with Eco Algae Research.

A beautifully illustrated exploration of Edward Lear's little-known career as a natural-history artist

The Natural History of Edward Lear: *New Edition*

“[Peck] has discovered a great deal that is new and which will fascinate anyone with a love for Lear and for fine natural history illustration.”—from the foreword by David Attenborough

With a new chapter discussing Lear's interest in pets, and never-before-published illustrations by Lear, this new edition offers invaluable perspectives on a beloved writer who was also one of the greatest natural-history artists of all time.

Robert McCracken Peck is senior fellow and curator of art and artifacts at the Academy of Natural Sciences of Drexel University.

2021. 240 pages. 215 colour illus. 178 x 254 mm
Paperback 9780691217239 £25.00

The first field guide that allows amateur rock enthusiasts to identify basic rocks and rock formations in a systematic way

Rocks and Rock Formations

Assuming little prior experience or knowledge, *Rocks and Rock Formations* is an invaluable resource for rock enthusiasts everywhere.

- Suitable for beginners and amateurs
- Helpful, systematic identification key
- Exploration of all types of rocks
- More than 530 diagrams and photographs

Jürg Meyer is a professional geologist and licensed mountain guide, as well as lecturer and author in the areas of geology and the environment.

Princeton Field Guides
June 2021. 192 pages. 534 colour photos. 140 x 216 mm
Paperback 9780691199528 £14.99

How one scientist unlocked the secrets behind some of nature's most astounding animals

Great Adaptations

From star-nosed moles that have super-sensing snouts to electric eels that paralyze their prey, animals possess unique and extraordinary abilities. In *Great Adaptations*, Kenneth Catania presents an entertaining and engaging look at some of nature's most remarkable creatures. Telling the story of his biological detective work, Catania sheds light on the mysteries behind the behaviours of tentacled snakes, tiny shrews, zombie-making wasps, and more. He shows not only how studying these animals can provide deep insights into how life evolved, but also how scientific discovery can be filled with adventure and fun.

Kenneth Catania is the Stevenson Professor of Biological Sciences at Vanderbilt University.

2020. 224 pages. 8 pg colour insert. 58 b/w illus. 156 x 235 mm
Hardback 9780691195254 £22.00

An enthralling exploration of the biologically richest island on Earth

New Guinea

In this beautiful, highly illustrated book, Bruce Beehler, a renowned author and expert on New Guinea, and award-winning *National Geographic* photographer Tim Laman take the reader on an unforgettable journey through the natural and cultural wonders of the world's grandest island.

“There is not another book on the market to come anywhere near this publication. Sit back and be drawn into such a landscape you can only dream of while at home.”

—John Miles, *Birdwatching*

Bruce M. Beehler is an ornithologist, naturalist, and author of many books. **Tim Laman** is a contributing photographer for *National Geographic*.

2020. 376 pages. 152 colour photos. 1 map. 235 x 279 mm
Hardback 9780691180304 £25.00

Princeton Nature

Princeton Nature publishes books that range far and wide in their coverage of the natural world including award-winning field guides, both photographic and illustrated, large-format reference books, and exceptional nature writing. Princeton Nature imprints and series include Princeton Field Guides, *WILDGuides*, and Wild Nature Press.

WILDGuides

“The future of field guides ... absolutely wonderful!”—Chris Packham

PRINCETON
WILDGuides

WILDGuides books are authoritative and invaluable photographic and illustrated guides to the natural world around us. The series is the brainchild of a couple of friends who aspired to produce natural history field guides of the highest quality. Andy Swash, ecologist, editor, and photographer and Rob Still, top graphic designer and ecologist, produce remarkable books of deep scholarship and cutting-edge design using both their own expertise as well as the skills of other experts in the field.

Twitter @wildguidesbooks

Wild Nature Press

Wild Nature Press books, written and produced by leading experts in the field, are an essential addition to any nature lover's

bookshelf. Marc Dando, zoologist and acclaimed scientific illustrator, and Julie Dando, designer and publisher, have nearly three decades of experience in producing natural history books of the highest quality and are the inspiration behind this impressive series. *WNP*, now published and distributed by Princeton University Press, is particularly well known for its ground-breaking books about the marine world.
