

# Princeton Philosophy

---

2022

"I have treasured Richard Rorty's witty, urbane, and generous voice since first encountering his writings in the late 1980s. He was the first philosopher whose thinking really changed my mind, and it stayed changed. I missed his voice in the turbulent events of the past several years, but this inspiring collection of his political essays reminds us how prescient and humane Rorty's thinking was, and how relevant it still is."

—Brian Eno

Prescient essays about the state of our politics from the philosopher who predicted that a populist demagogue would become president of the United States

## What Can We Hope For?

Richard Rorty, one of the most influential intellectuals of recent decades, is perhaps best known today as the philosopher who, almost two decades before the 2016 U.S. presidential election, warned of the rise of a Trumpian strongman in America. *What Can We Hope For?* gathers nineteen of Rorty's essays on American and global politics, including four previously unpublished and many lesser-known and hard-to-find pieces.

In these provocative and compelling essays, Rorty confronts the critical challenges democracies face at home and abroad, including populism, growing economic inequality, and overpopulation and environmental devastation. In response, he offers optimistic and realistic ideas about how to address these crises. He outlines strategies for fostering social hope and building an inclusive global community of trust, and urges us to put our faith in trade unions, universities, bottom-up social campaigns, and bold political visions that thwart ideological pieties.

Driven by Rorty's sense of emergency about our collective future, *What Can We Hope For?* is filled with striking diagnoses of today's political crises and creative proposals for solving them.

**Richard Rorty** (1931–2007) was an eminent American pragmatist philosopher and public intellectual. Among his many books are *Achieving Our Country*, *Philosophy and Social Hope*, and *Philosophy and the Mirror of Nature* (Princeton). **W. P. Malecki** is associate professor of literary theory at the University of Wrocław, Poland. His books include *Human Minds and Animal Stories*. **Chris Voparil** teaches philosophy and political theory on the Graduate Faculty of Union Institute & University in Cincinnati, Ohio. His most recent book is *Reconstructing Pragmatism: Richard Rorty and the Classical Pragmatists*.

Something is seriously wrong. An alarming number of citizens, in America and around the world, are embracing crazy, even dangerous ideas.

### When Bad Thinking Happens to Good People

How Philosophy Can Save Us from Ourselves

Steven Nadler and Lawrence Shapiro

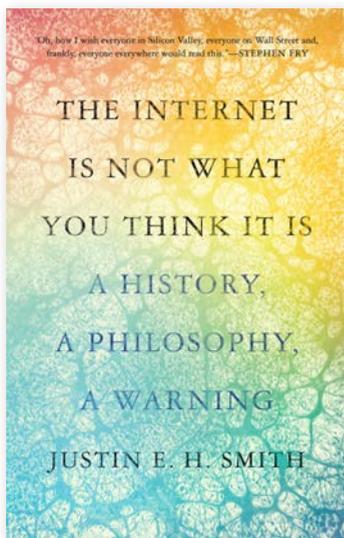

Why the tools of philosophy offer a powerful antidote to today's epidemic of irrationality

## When Bad Thinking Happens to Good People

There is an epidemic of bad thinking in the world today. An alarming number of people are embracing crazy, even dangerous ideas. Worse, bad thinking drives bad acting—it even inspired a mob to storm the U.S. Capitol. *When Bad Thinking Happens to Good People* provides an engaging tour through the basic principles of logic, argument, evidence, and probability that can make all of us more reasonable and responsible citizens.

**Steven Nadler** is the William H. Hay II Professor of Philosophy at the University of Wisconsin–Madison, where he is the director of the Institute for Research in the Humanities. **Lawrence Shapiro** is the Berent Enç Professor of Philosophy at the University of Wisconsin–Madison.

An original deep history of the internet that tells the story of the centuries-old utopian dreams behind it—and explains why they have died today

## The Internet Is Not What You Think It Is

Justin Smith offers an original deep history of the internet, from the ancient to the modern world—uncovering its origins in nature and centuries-old dreams of radically improving human life by outsourcing thinking to machines and communicating across vast distances. Yet, despite the internet's continuing potential, Smith argues, the utopian hopes behind it have finally died today. This book cuts through our daily digital lives to give a clear-sighted picture of what the internet is, where it came from, and where it might be taking us in the coming decades.

**Justin E. H. Smith** is professor of history and philosophy of science at the University of Paris.

A philosophical exploration of female submission, using insights from feminist thinkers to reveal the complexities of women's reality and lived experience

## We Are Not Born Submissive

What role do women play in the perpetuation of patriarchy? On the one hand, popular media urges women to be independent, outspoken, and career-minded. Yet, this same media glorifies a specific, sometimes voluntary, female submissiveness as a source of satisfaction. In philosophy, even less has been said on why women submit to men and the discussion has been equally contradictory. Is there a way to explore female submission in all of its complexity? Moving beyond the simplistic binary of natural destiny or moral vice, *We Are Not Born Submissive* takes a sophisticated look at how female submissiveness can be explained.

**Manon Garcia** is assistant professor of philosophy at Yale University.

An expansive look at how culture shapes our emotions—and how we can benefit, as individuals and a society, from less anger and more shame

## How to Do Things with Emotions

Everywhere we look, we see values clashing and tempers rising, in ways that seem frenzied, aimless, and cruel. At the same time, we witness political leaders and others who lack any sense of shame, even as they display carelessness with the truth and the common good. In *How to Do Things with Emotions*, Owen Flanagan explains that emotions are things we do, and he reminds us that those like anger and shame involve cultural norms and scripts. *How to Do Things with Emotions* celebrates the plasticity of our emotional responses—and our freedom to recalibrate them in the pursuit of more fulfilling lives.

**Owen Flanagan** is the James B. Duke Distinguished Professor of Philosophy and professor of psychology and neuroscience at Duke University.

An engaging and illuminating exploration of grief—and why, despite its intense pain, it can also help us grow

## Grief

Experiencing grief at the death of a person we love or who matters to us—as universal as it is painful—is central to the human condition. Surprisingly, however, philosophers have rarely examined grief in any depth. In *Grief*, Michael Cholbi presents a groundbreaking philosophical exploration of this complex emotional event, offering new insights about what grief is, whom we grieve, and how grief can ultimately lead us to a richer self-understanding and a fuller realization of our humanity. An original account of how grieving works and why it is so important, *Grief* shows how the pain of this experience gives us a chance to deepen our relationships with others and ourselves.

**Michael Cholbi** is Chair in Philosophy at the University of Edinburgh.

Two simple yet tremendously powerful ideas that shaped virtually every aspect of civilization

## The Two Greatest Ideas

This book is a breathtaking examination of the two greatest ideas in human history. The first is the idea that the human mind can grasp the universe. The second is the idea that the human mind can grasp itself. This panoramic book reveals what is missing in our conception of ourselves and the world, and imagines a not-too-distant future when a third great idea, the idea that human minds can grasp each other, will help us gain an idea of the whole of reality.

**Linda Trinkaus Zagzebski** is George Lynn Cross Research Professor Emerita and the Kingfisher College Chair of the Philosophy of Religion and Ethics Emerita at the University of Oklahoma.

Why you don't have a self—and why that's a good thing

## Losing Ourselves

In *Losing Ourselves*, Jay Garfield, a leading expert on Buddhist philosophy, offers a brief and radically clear account of an idea that at first might seem frightening but that promises to liberate us and improve our lives, our relationships, and the world. Drawing on Indian and East Asian Buddhism, Daoism, Western philosophy, and cognitive neuroscience, Garfield shows why it is perfectly natural to think you have a self—and why it actually makes no sense at all and is even dangerous. The result is a transformative book about why we have nothing to lose—and everything to gain—by losing our selves.

**Jay L. Garfield** is the Doris Silbert Professor in the Humanities and Professor of Philosophy, Logic, and Buddhist Studies at Smith College and a visiting professor of Buddhist philosophy at Harvard Divinity School.

A spellbinding look at the philosophical and moral implications of animal dreaming

## When Animals Dream

Are humans the only dreamers on Earth? What goes on in the minds of animals when they sleep? *When Animals Dream* brings together behavioral and neuroscientific research on animal sleep with philosophical theories of dreaming. It shows that dreams provide an invaluable window into the cognitive and emotional lives of nonhuman animals, giving us access to a seemingly inaccessible realm of animal experience. A mesmerizing journey into the otherworldly domain of nonhuman consciousness, *When Animals Dream* carries profound implications for contemporary debates about animal cognition, animal ethics, and animal rights, challenging us to regard animals as beings who matter, and for whom things matter.

**David M. Peña-Guzmán** is associate professor of humanities and liberal studies at San Francisco State University.

Invaluable wisdom on living a good life from one of the Enlightenment's greatest philosophers

## The Great Guide

David Hume (1711–1776) is perhaps best known for his ideas about cause and effect and his criticisms of religion, but he is rarely thought of as a philosopher with practical wisdom to offer. *The Great Guide* is an engaging and eye-opening account of how Hume's thought should serve as the basis for a complete approach to life. *The Great Guide* includes 145 Humean maxims for living well, on topics ranging from the meaning of success and the value of travel to friendship, facing death, identity, and the importance of leisure. This book shows how life is far richer with Hume as your guide.

A bold reevaluation of Spinoza that reveals his powerful, inclusive vision of religion for the modern age

## Spinoza's Religion

Spinoza is widely regarded as either a God-forsaking atheist or a God-intoxicated pantheist, but Clare Carlisle says that he was neither. In *Spinoza's Religion*, she sets out a bold interpretation of Spinoza through a lucid new reading of his masterpiece, the *Ethics*. Putting the question of religion centre-stage but refusing to convert Spinozism to Christianity, Carlisle reveals that “being in God” unites Spinoza's metaphysics and ethics. *Spinoza's Religion* unfolds a powerful, inclusive philosophical vision for the modern age—one that is grounded in a profound questioning of how to live a joyful, fully human life. Seen through Carlisle's eyes, the *Ethics* prompts us to rethink not only Spinoza but also religion itself.

**Clare Carlisle** is Professor of Philosophy at King's College London.

An eminent philosopher explains why we owe it to future generations to take immediate action on global warming

## The Pivotal Generation

Climate change is the supreme challenge of our time. Yet despite growing international recognition of the unfolding catastrophe, global carbon emissions continue to rise, hitting an all-time high in 2019. Henry Shue makes an impassioned case for taking immediate, radical action to combat global warming. Written in direct, accessible language, *The Pivotal Generation* approaches the latest scientific research with a singular moral clarity. It's an urgently needed call to action for anyone concerned about the planet's future.

**Henry Shue** is Senior Research Fellow at the Centre for International Studies at the University of Oxford, where he is also Senior Research Fellow Emeritus at Merton College.

How the utopian tradition offers answers to today's environmental crises

## Utopianism for a Dying Planet

In the face of Earth's environmental breakdown, it is clear that technological innovation alone won't save our planet. A more radical approach is required, one that involves profound changes in individual and collective behavior. *Utopianism for a Dying Planet* examines the ways the expansive history of utopian thought, from its origins in ancient Sparta and ideas of the Golden Age through to today's thinkers, can offer moral and imaginative guidance in the face of catastrophe. An urgent and comprehensive search for antidotes to our planet's destruction, *Utopianism for a Dying Planet* asks for a revival of utopian ideas, not as an escape from reality, but as a powerful means of changing it.

**Gregory Claeys** is professor emeritus of the history of political thought at the University of London.

An intellectual history of the philosophers who grappled with the problem of evil, and the case for why pessimism still holds moral value for us today

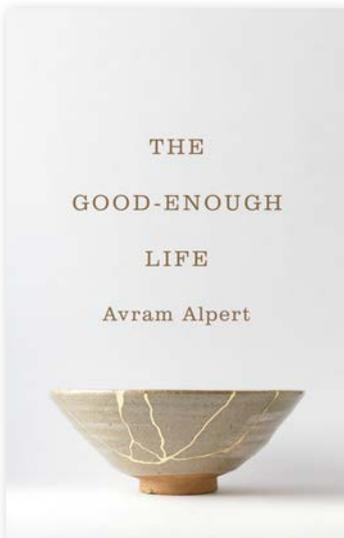

## Dark Matters

In the seventeenth and eighteenth centuries, philosophers engaged in heated debates on the question of how God could have allowed evil and suffering in a creation that is supposedly good. *Dark Matters* makes a compelling case for the rediscovery of pessimism as a source for compassion, consolation, and perhaps even hope. A breathtaking work of intellectual history by one of today's leading scholars, *Dark Matters* reveals how the crucial moral aim of pessimism is to find a way of speaking about suffering that offers consolation and does justice to the fragility of life.

**Mara van der Lugt** is lecturer in philosophy at the University of St Andrews, where she specializes in early modern intellectual history and philosophy.

How an acceptance of our limitations can lead to a more fulfilling life and a more harmonious society

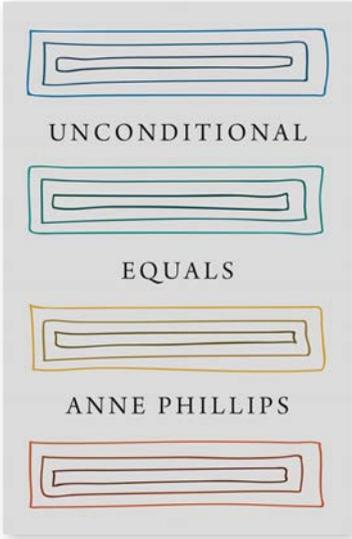

## The Good-Enough Life

We live in a world oriented toward greatness, one in which we feel compelled to be among the wealthiest, most powerful, and most famous. This book explains why no one truly benefits from this competitive social order, and reveals how another way of life is possible—a good-enough life for all. Avram Alpert shows how our obsession with greatness results in stress and anxiety, damage to our relationships, widespread political and economic inequality, and destruction of the natural world. Visionary and provocative, *The Good-Enough Life* demonstrates how we can work together to cultivate a good-enough life for all instead of tearing ourselves apart in a race to the top of the social pyramid.

**Avram Alpert** is lecturer in the Writing Program at Princeton University and coeditor of *Shifter* magazine.

Why equality cannot be conditional on a shared human “nature” but has to be for all

## Unconditional Equals

In *Unconditional Equals*, political philosopher Anne Phillips challenges attempts to justify equality by reference to a shared human nature, arguing that justification turns into conditions and ends up as exclusion. Drawing on political, feminist, and postcolonial theory, *Unconditional Equals* argues that we should understand equality not as something grounded in shared characteristics but as something people enact when they refuse to be considered inferiors. The book makes a powerful case for seeing equality as a commitment we make to ourselves and others, and a claim we make on others when they deny us our status as equals.

**Anne Phillips** is the Graham Wallas Professor of Political Science at the London School of Economics, where she previously directed the LSE Gender Institute.

A compelling account of the threat immigration control poses to the citizens of free societies

## Immigration and Freedom

Immigration is often seen as a danger to western liberal democracies because it threatens to undermine their fundamental values, most notably freedom and national self-determination. In this book, however, Chandran Kukathas argues that the greater threat comes not from immigration but from immigration control. Kukathas shows that immigration control is not merely about preventing outsiders from moving across borders. It is about controlling what outsiders do once in a society. *Immigration and Freedom* presents a critique of immigration control as an institutional reality, as well as an account of what freedom means—and why it matters.

**Chandran Kukathas** is the Lee Kong Chian Professor of Political Science and Dean of the School of Social Sciences at Singapore Management University.

A timely defense of liberalism that draws vital lessons from its greatest midcentury proponents

## Liberalism in Dark Times

Today, liberalism faces threats from across the political spectrum. While right-wing populists and leftist purists righteously violate liberal norms, theorists of liberalism seem to have little to say. In *Liberalism in Dark Times*, Joshua Cherniss issues a rousing defense of the liberal tradition, drawing on a neglected strand of liberal thought. Building on the work of these thinkers, Cherniss urges us to imagine liberalism not as a set of policies but as a temperament or disposition—one marked by openness to complexity, willingness to acknowledge uncertainty, tolerance for difference, and resistance to ruthlessness. In the face of rising political fanaticism, he persuasively argues for the continuing importance of this liberal ethos.

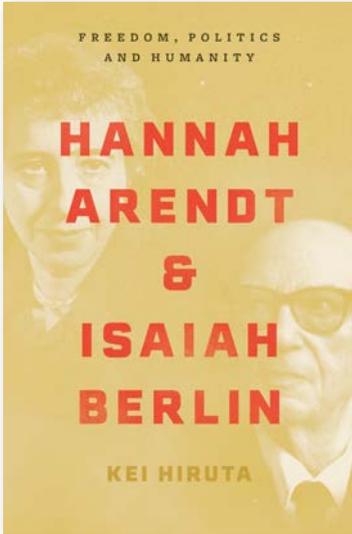

**Joshua L. Cherniss** is associate professor of government at Georgetown University.

An argument for why Plato's *Laws* can be considered his most important political dialogue

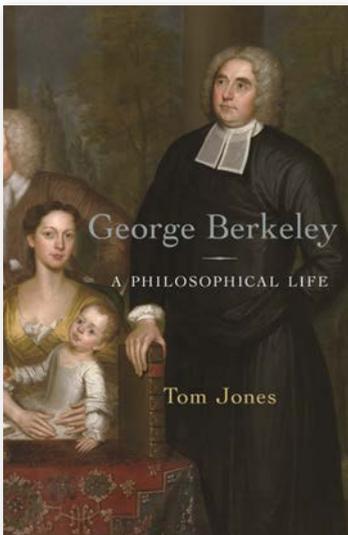

## Beyond the Republic

In *Beyond the Republic*, André Laks argues that the *Laws*, Plato's last and longest dialogue, is also his most important political work, surpassing the *Republic* in historical relevance. Laks offers a thorough reappraisal of this less renowned text, and examines how it provides a critical foundation for the principles of lawmaking. In doing so, he makes clear the tremendous impact the *Laws* had not only on political philosophy, but also on modern political history. *Beyond the Republic* presents a sophisticated reevaluation of a philosophical work that has exerted an enormous if often hidden influence even into the present day.

**André Laks** is professor emeritus of ancient philosophy at the Paris-Sorbonne University and teaches at the Panamerican University in Mexico City.

A comprehensive intellectual biography of the Enlightenment philosopher

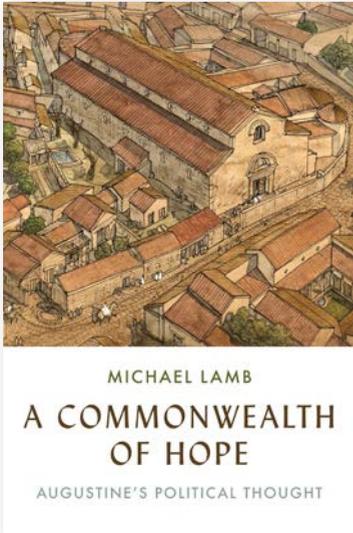

## George Berkeley

In *George Berkeley: A Philosophical Life*, Tom Jones provides a comprehensive account of the life and work of the pre-eminent Irish philosopher of the Enlightenment. From his early brilliance as a student and fellow at Trinity College Dublin to his later years as Bishop of Cloyne, Berkeley brought his searching and powerful intellect to bear on the full range of eighteenth-century thought and experience. Jones brings vividly to life the complexities and contradictions of Berkeley's life and ideas. The result is a richly detailed and rounded portrait of a major Enlightenment thinker and the world in which he lived.

**Tom Jones** is Reader in the School of English at the University of St Andrews.

A bold new interpretation of Augustine's virtue of hope and its place in political life

## A Commonwealth of Hope

When it comes to politics, Augustine of Hippo is renowned as one of history's great pessimists, with his sights set firmly on the heavenly city rather than the public square. Many have enlisted him to chasten political hopes, highlighting the realities of evil and encouraging citizens instead to cast their hopes on heaven. *A Commonwealth of Hope* challenges prevailing interpretations of Augustinian pessimism, offering a new vision of his political thought that can also help today's citizens sustain hope in the face of despair.

**Michael Lamb** is assistant professor of politics, ethics, and interdisciplinary humanities and executive director of the Program for Leadership and Character at Wake Forest University.

A radical reinterpretation of Adam Smith that challenges economists, moral philosophers, political theorists, and intellectual historians to rethink him—and why he matters

## Adam Smith Reconsidered

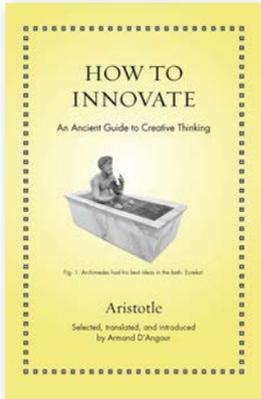

Adam Smith has long been recognized as the father of modern economics. More recently, scholars have emphasized his standing as a moral philosopher—one who was prepared to critique markets as well as to praise them. But Smith's contributions to political theory are still underappreciated and relatively neglected. In this bold, revisionary book, Paul Sagar argues that not only have the fundamentals of Smith's political thought been widely misunderstood, but that once we understand them correctly, our estimations of Smith as economist and as moral philosopher must radically change.

**Paul Sagar** is senior lecturer in political theory at King's College London.

A sophisticated, original introduction to the philosophy of mathematics from one of its leading thinkers

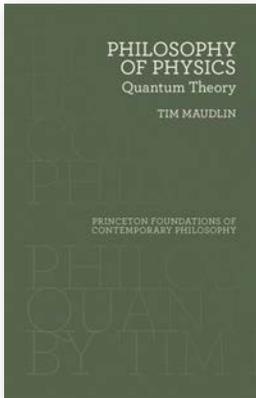

## Philosophy of Mathematics

Mathematics is a model of precision and objectivity, but it appears distinct from the empirical sciences because it seems to deliver nonexperiential knowledge of a nonphysical reality of numbers, sets, and functions. How can these two aspects of mathematics be reconciled? This concise book provides a systematic, accessible introduction to the field that is trying to answer that question: the philosophy of mathematics. Øystein Linnebo, one of the world's leading scholars on the subject, introduces all of the classical approaches to the field as well as more specialized issues, including mathematical intuition, potential infinity, and the search for new mathematical axioms. Sophisticated but clear and approachable, this is an essential book for all students and teachers of philosophy and of mathematics.

Øystein Linnebo is professor of philosophy at the University of Oslo.

A concise introduction to logic that teaches you not only how reasoning works, but why it works

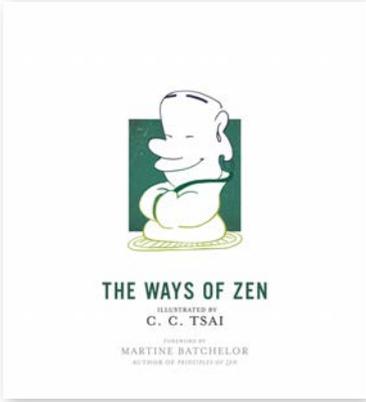

## How Logic Works

*How Logic Works* is an introductory logic textbook that is different by design. Rather than teaching elementary symbolic logic as an abstract or rote mathematical exercise divorced from ordinary thinking, Hans Halvorson presents it as the skill of clear and rigorous reasoning, which is essential in all fields and walks of life, from the sciences to the humanities—anywhere that making good arguments, and spotting bad ones, is critical to success. By teaching logic in a way that makes students aware of how they already use it, the book will help them to become even better thinkers.

**Hans Halvorson** is Stuart Professor of Philosophy at Princeton University. His previous books include *The Logic in Philosophy of Science*.

From bestselling cartoonist C. C. Tsai, a delightfully illustrated collection of classic Zen Buddhist stories that enlighten as they entertain

## The Ways of Zen

C. C. Tsai is one of Asia’s most popular cartoonists, and his editions of the Chinese classics have sold more than 40 million copies in over twenty languages. In *The Ways of Zen*, he has created an entertaining and enlightening masterpiece from the rich collections of the Zen Buddhist tradition, bringing classic stories to life in delightful language and vividly detailed comic illustrations. Combining all the stories previously published in Tsai’s *Wisdom of the Zen Masters* and *Zen Speaks*, this is the artist’s largest collection of selections from the most important and famous Zen texts. Filled with memorable anecdotes and disarming wisdom, *The Ways of Zen* is a perfect introduction to Zen Buddhism and an essential addition to any Zen collection.

C. C. Tsai is one of Asia’s most beloved illustrators. **Brian Bruya** is professor of philosophy at Eastern Michigan University. **Martine Batchelor** teaches meditation retreats worldwide.

A trenchant defense of hierarchy in different spheres of our lives, from the personal to the political

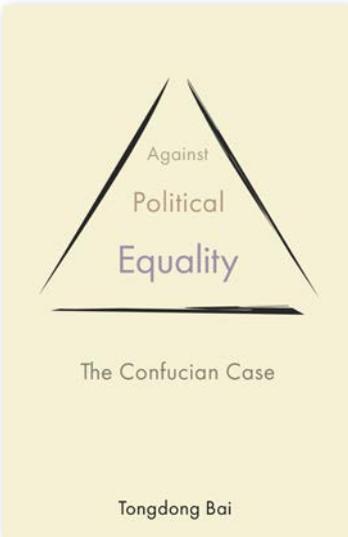

## Just Hierarchy

All complex and large-scale societies are organized along certain hierarchies, but the concept of hierarchy has become almost taboo in the modern world. *Just Hierarchy* contends that this stigma is a mistake. Bell and Wang ask which forms of hierarchy are justified and how these can serve morally desirable goals. A vigorous, systematic defense of hierarchy in the modern world, *Just Hierarchy* examines how hierarchical social relations can have a useful purpose, not only in personal domains but also in larger political realms.

**Daniel A. Bell** is dean of the School of Political Science and Public Administration at Shandong University in Qingdao. **Wang Pei** is assistant professor at the China Institute at Fudan University in Shanghai.

How a form of governance inspired by Confucianism might solve today's political problems

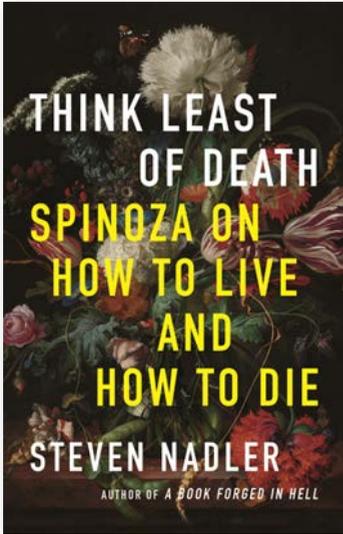

## Against Political Equality

What might a viable political alternative to liberal democracy look like? *Against Political Equality* offers a possibility inspired by Confucian ideas. Tongdong Bai argues that domestic governance influenced by Confucianism can embrace the liberal aspects of democracy along with the democratic ideas of equal opportunities and governmental accountability to the people. Exploring the deficiencies posed by many liberal democracies, *Against Political Equality* presents a novel Confucian-engendered alternative for solving today's political problems.

**Tongdong Bai** is the Dongfang Professor of Philosophy at Fudan University in Shanghai and a Global Professor of Law at New York University School of Law.

“[A] vibrant study.”—*New Yorker*

## Think Least of Death

Baruch Spinoza became notorious across Europe for his views on God, the Bible, and miracles, as well as for his uncompromising defense of free thought. Yet the radicalism of Spinoza’s views has long obscured that his primary reason for turning to philosophy was to answer one of humanity’s most urgent questions: How can we lead a good life and enjoy happiness in a world without a providential God? In *Think Least of Death*, Pulitzer Prize–finalist Steven Nadler connects Spinoza’s ideas with his life and times to offer a compelling account of how the philosopher can provide a guide to living one’s best life.

**Steven Nadler** is Vilas Research Professor and the William H. Hay II Professor of Philosophy at the University of Wisconsin–Madison.

How philosophy transformed human knowledge and our world

## The World Philosophy Made

Philosophical investigation is the root of all human knowledge. Developing new concepts, reinterpreting old truths, and reconceptualizing fundamental questions, philosophy has driven human progress for over two millennia. In this history, Scott Soames demonstrates not only philosophy’s profound impact on our religion, our morality, and our understanding of ourselves, but also its world-shaping contributions to modern science, technology, and politics. *The World Philosophy Made* explains and illuminates as never before the inexhaustible richness of philosophy and its influence on our individual and collective lives.

**Scott Soames** is Distinguished Professor of Philosophy at the University of Southern California and a member of the American Academy of Arts and Sciences.

## Sick Souls, Healthy Minds

In 1895, William James delivered a lecture entitled “Is Life Worth Living?” Indeed, as John Kaag writes, “James’s entire philosophy, from beginning to end, was geared to save a life, *his* life”—and that’s why it just might be able to save yours, too. This book is an absorbing introduction to James’s life and thought that shows why the founder of pragmatism and empirical psychology can still speak to anyone struggling to make a life worth living.

**John Kaag** is professor of philosophy at the University of Massachusetts, Lowell.

2021. 224 pages.  
 Paperback 9780691216713 \$14.95 | £11.99 ebook 9780691200934

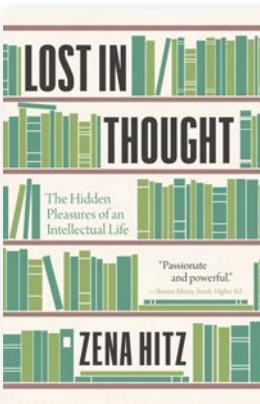

## The Murder of Professor Schlick

On June 22, 1936, the philosopher Moritz Schlick was on his way to deliver a lecture at the University of Vienna when a deranged former student of Schlick’s shot him dead on the university steps. Weaving a narrative set against the backdrop of rising extremism in Hitler’s Europe, this book traces the rise and fall of the Vienna Circle and of a philosophical movement that sought to do away with metaphysics and pseudoscience in a city darkened by unreason.

**David Edmonds** is a distinguished research fellow at the Oxford Uehiro Centre for Practical Ethics.

## Lost in Thought

In an overloaded, superficial, technological world, in which almost everything and everybody is judged by its usefulness, where can we turn for escape, lasting pleasure, contemplation, or connection to others? While many forms of leisure meet these needs, Zena Hitz writes, few experiences are so fulfilling as the inner life. *Lost in Thought* is a moving account of why renewing our inner lives is fundamental to preserving our humanity.

**Zena Hitz** is a Tutor in the great books program at St. John’s College in Annapolis, Maryland.

2021. 240 pages.  
 Paperback 9780691229195 \$16.95 | £12.99 ebook 9780691189239

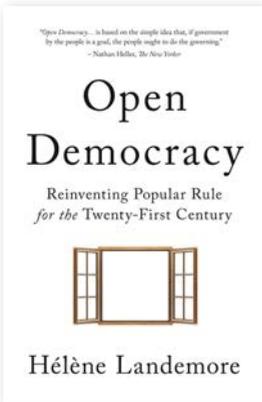

## Justice and the Politics of Difference

*Justice and the Politics of Difference* challenges the prevailing reduction of social justice to distributive justice, critically analyzing basic concepts underlying most theories of justice such as impartiality, formal equality, and the unitary moral subjectivity. Iris Marion Young argues for a principle of group representation in democratic publics and for group-differentiated policies.

**Iris Marion Young** (1949–2006) was professor of political science at the University of Chicago. **Danielle Allen** is the James Bryant Conant University Professor at Harvard University.

## Open Democracy

Diagnosing what is wrong with representative government and aiming to recover some of the openness of ancient democracies, *Open Democracy* presents a new paradigm of democracy. Hélène Landemore demonstrates that placing ordinary citizens, rather than elites, at the heart of democratic power is not only the true meaning of a government of, by, and for the people, but also feasible and, more than ever, urgently needed.

**Hélène Landemore** is associate professor of political science at Yale University.

March 2022. 272 pages. 1 b/w illus. 1 table.  
 Paperback 9780691212395 \$22.95 | £17.99 ebook 9780691208725

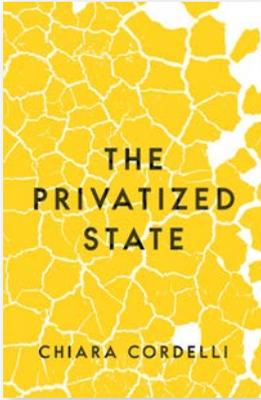

## On Mercy

Since antiquity, mercy has been regarded as a virtue. Yet by the end of the eighteenth century, mercy had been exiled from political life. In this book, Malcolm Bull analyses and challenges the Enlightenment's rejection of mercy. An important contribution to political philosophy from an inventive thinker, *On Mercy* makes a persuasive case for returning this neglected virtue to the heart of political thought.

**Malcolm Bull** is Professor of Art and the History of Ideas at the University of Oxford and a Senior Associate Research Fellow of Christ Church, Oxford.

2021. 208 pages.  
 Paperback 9780691217451 \$17.95 | £14.99 ebook 9780691185736

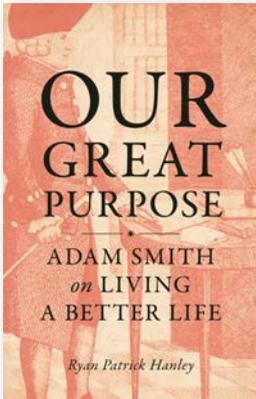

## The Privatized State

Many governmental functions today—from the management of prisons and welfare offices to warfare and financial regulation—are outsourced to private entities. Can a privatized government rule legitimately? *The Privatized State* argues that it cannot. This book shows how privatization undermines the very reason political institutions exist in the first place, and advocates for a new way of administering public affairs that is more democratic and just.

**Chiara Cordelli** is associate professor of political science at the University of Chicago.

May 2022. 352 pages. 3 b/w illus.

## Our Great Purpose

Adam Smith is best known today as the founder of modern economics, but he was also a brilliant philosopher who was interested in the perennial question of how to live a good life. Full of invaluable insights on topics ranging from happiness and moderation to love and friendship, *Our Great Purpose* enables modern readers to see Smith in an entirely new light—and along the way, learn what it truly means to possess an excellent character and lead a worthy life.

**Ryan Patrick Hanley** is professor of political science at Boston College.

2021. 176 pages.  
Paperback 9780691216706 \$14.95 | £11.99 ebook 9780691197753

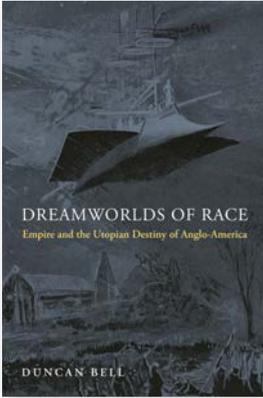

## Systemic Corruption

This provocative book reveals how the majority of modern liberal democracies have become increasingly oligarchic, suffering from a form of structural political decay first conceptualized by ancient philosophers. *Systemic Corruption* proposes to reverse the decay of democracy with the establishment of anti-oligarchic institutions through which common people can collectively resist the domination of the few.

**Camila Vergara** is a postdoctoral research scholar and lecturer at the Eric H. Holder Jr. Initiative for Civil and Political Rights at Columbia Law School.

June 2022. 312 pages. 21 b/w illus.

## Dreamworlds of Race

Between the late nineteenth century and the First World War an ocean-spanning network of prominent individuals advocated the unification of Britain and the United States. Tracing how intellectual elites promoted an ambitious project of political and racial unification, *Dreamworlds of Race* analyzes ideas of empire and world order that reverberate to this day.

**Duncan Bell** is Professor of Political Thought and International Relations at the University of Cambridge, and a Fellow of Christ's College.

## Freedom, Resentment, and the Metaphysics of Morals

P. F. Strawson was one of the most important philosophers of the twentieth century, and his 1962 paper “Freedom and Resentment” is one of the most influential in modern moral philosophy, prompting responses across multiple disciplines. This book sheds new light on Strawson’s thinking and has profound implications for future work on free will, moral responsibility, and metaethics.

**Pamela Hieronymi** is professor of philosophy at the University of California, Los Angeles.

## In Search of the Soul

The concept of the soul has been a recurring area of exploration since ancient times. *In Search of the Soul* takes readers on a journey into the origins of the soul in Western philosophy and culture, and examines how the idea has developed throughout history to the present. A better understanding of the soul might help all of us better understand what it is to be human.

**John Cottingham** is Professor Emeritus of Philosophy at the University of Reading, Professor of Philosophy of Religion at Roehampton University, and an Honorary Fellow of St. John’s College, Oxford.

April 2022. 192 pages. 1 b/w illus.

## Calling Philosophers Names

This book provides an account of the origins of the term *philosophos* or “philosopher” in ancient Greece. Christopher Moore shows how it first referred to advice-givers, then to conversationalists about virtue, and finally to investigators who focused on the conditions of those conversations. *Calling Philosophers Names* seeks to understand who were called *philosophoi*, and how the use of and reflections on the word contributed to the rise of a discipline.

**Christopher Moore** is associate professor of philosophy and classics at Pennsylvania State University.

2021. 440 pages. 1 map.  
Paperback 9780691230221 \$32.95 | £25.00 ebook 9780691197425

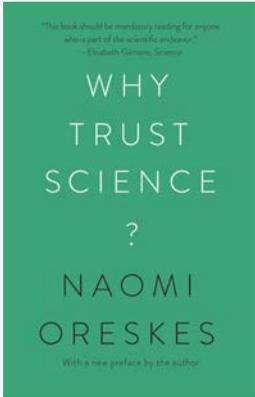

## Not Born Yesterday

*Not Born Yesterday* explains how we decide who we can trust and what we should believe—and argues that we’re pretty good at making these decisions. Drawing on recent findings from political science and other fields ranging from history to anthropology, Mercier shows that the narrative of widespread gullibility is simply wrong. *Not Born Yesterday* shows how we filter the flow of information that surrounds us, argues that we do it well, and explains how we can do it better still.

**Hugo Mercier** is a cognitive scientist at the Jean Nicod Institute in Paris.

March 2022. 384 pages. 4 b/w illus.  
Paperback 9780691208923 \$19.95 | £14.99 ebook 9780691198842

## Why Trust Science?

This book offers a compelling defense of science, revealing why the social character of scientific knowledge is its greatest strength—and the greatest reason we can trust it. This timely and provocative book features a new preface by Oreskes and critical responses, as well as a foreword by political theorist Stephen Macedo.

**Naomi Oreskes** is the Henry Charles Lea Professor of the History of Science and affiliated professor of Earth and planetary sciences at Harvard University.

## On the Future

Humanity has reached a critical moment. Our world is unsettled and rapidly changing, and we face existential risks over the next century. Martin Rees argues that humanity's prospects depend on our taking a very different approach to planning for tomorrow. This book will captivate anyone who wants to understand the critical issues that will define the future of humanity on Earth and beyond.

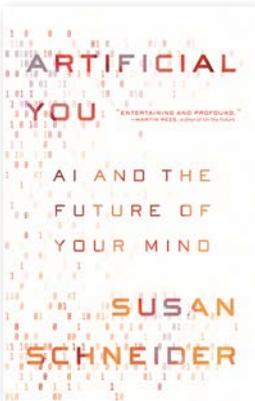

**Martin Rees** is Astronomer Royal, and has been Master of Trinity College and Director of the Institute of Astronomy at Cambridge University.

## Artificial You

We are at a monumental turning point in human history. AI research is going inside the human brain itself, attempting to augment human minds. It may even create greater-than-human-level intelligence, leading to a new generation of artificial minds—Minds 2.0. Examining the philosophical questions lying beneath the algorithms, Schneider takes on AI's thorniest implications.

**Susan Schneider** is the NASA/Baruch Blumberg Chair of Astrobiology and Technological Innovation at the Library of Congress and NASA, and the Dietrich Distinguished Professor of Philosophy and Neuroscience at Florida Atlantic University.
